Dingley,A. J.

Dingley,Steven M. Pascal,2011 Nuclear Magnetic Resonance NMR spectroscopy is the most powerful technique for characterisation of biomolecular structures at atomic resolution in the solution state This timely book entitled Biomolecular NMR Spectroscopy focuses on the latest state of the art NMR techniques for characterisation of biological macromolecules in the solid and solution state The editors Dr Andrew Dingley University of Auckland New Zealand and Dr Steven Pascal Massey University New Zealand have organised the book into four sections covering the following topics i sample preparation ii structure and dynamics of proteins iii structure and dynamics of nucleic acids and protein nucleic acid complexes and iv rapid and hybrid techniques including the latest advances in NMR data acquisition and structural analysis and approaches that combine NMR data with data from complementary physical techniques The book will be a valuable resource for experienced scientists in academia government and public services and in industry It will also be suitable for newcomers and graduate students entering the field of biomolecular NMR spectroscopy **Spectroscopy of Biological Molecules** Maria

Paula Marques,Luís A.E. Batista de Carvalho,2013-12-15 This book presents contributions from some of the leading experts in spectroscopic techniques including infrared Raman NMR fluorescence and Circular Dichroism spectroscopy Structural characterization of biomolecules cells tissues and whole organisms are amongst the topics that were covered by these experts at the 14th European Conference on Spectroscopy of Biological Molecules ECSBM2011 held at the University of Coimbra Portugal from 29th August to 3rd September 2011 of which this book contains the papers The book would be particularly valuable for those interested in vibrational spectroscopy and imaging of cells and tissues applications of spectroscopy in biotechnology single cell studies and microbial characterization It highlights the potential of spectroscopy and imaging in medical diagnosis and screening and discusses issues related to methodology including data acquisition analysis and processing that would be valuable for scientists who are new to the field The book would be an important reference source for scientists in academia and industry as well as early stage researchers such as graduate students and post doctoral researchers *Biophysical Approaches to Translational Control of Gene Expression* Jonathan D.

Dinman,2012-07-27 This book highlights major advances in researching a cell s molecular machinery through analytical computational and imaging methods It focuses on developing biophysical approaches to studying control of gene expression

at the translational level *Vibrational Spectroscopy in Diagnosis and Screening* Feride Severcan, Parvez I. Haris, 2012 In recent years there has been a tremendous growth in the use of vibrational spectroscopic methods for diagnosis and screening These applications range from diagnosis of disease states in humans such as cancer to rapid identification and screening of microorganisms The growth in such types of studies has been possible thanks to advances in instrumentation and associated computational and mathematical tools for data processing and analysis This volume of *Advances in Biomedical Spectroscopy* contains chapters from leading experts who discuss the latest advances in the application of Fourier transform infrared FTIR Near infrared NIR Terahertz and Raman spectroscopy for diagnosis and screening in fields ranging from medicine dentistry forensics and aquatic science Many of the chapters provide information on sample preparation data acquisition and data interpretation that would be particularly valuable for new users of these techniques including established scientists and graduate students in both academia and industry *Plasmonic Biosensors* A.B. Dahlin, 2012-01-11 In this book Andreas Dahlin has written a comprehensive and thorough review of plasmonic biosensors that operate by refractometric detection After an introductory chapter on biosensors in which he sets out the concepts of biosensing in its application to such areas as proteomics medical diagnostics and environmental control he undertakes an integrated coverage of surface chemistry surface physics and optics specifically related to the requirements of design of a plasmonic biosensor Sections on nanoparticle plasmons and surface plasmons follow leading to a review of SPR technology for biosensing The optical properties of nanoholes in metal films and other more complicated plasmonic nanostructures are also briefly discussed Later chapters discuss experimental plasmon spectroscopy and spectral analysis while the final sections discuss topics such as sensor response and the extent to which quantitative measurements can be made The book introduces a few relatively controversial opinions on some open questions such as how best to define sensor performance and the practical use of highly miniaturized sensors Each of the chapters is extensively referenced and contains appropriate illustrations The book contains a wealth of information that will be highly beneficial to both existing and new users of refractometric sensing techniques in life science research It will be a valuable resource for post graduate research students academic researchers and those working in industry **Annual Reports on NMR Spectroscopy**, 2018-01-02 *Annual Reports on NMR Spectroscopy* Volume 93 provides a thorough and in depth accounting of progress in nuclear magnetic resonance NMR spectroscopy and its many applications This updated volume in this premier resource for both specialists and non specialists focuses on NMR at Giga Pascal Pressures Ultrafast 2D NMR Methods and Applications Perspective on the Hyperpolarization Technique Signal Amplification by Reversible Exchange SABRE in NMR Spectroscopy and MR Imaging and Recent Advances in 11B Solid State Nuclear Magnetic Resonance Spectroscopy of Crystalline Solids and Progress in Our Understanding of 19F Chemical Shifts amongst other timely topics Serves as the premier resource for learning the new techniques and applications of NMR spectroscopy Provides a key reference for chemists and physicists using NMR
