Mobile Computing Deployment and Management Robert J. Bartz, 2015-02-06 Mobile computing skills are becoming standard in the IT industry Mobile Computing Deployment and Management Real World Skills for CompTIA Mobility Certification and Beyond is the ultimate reference for mobile computing Certified Wireless Network Expert Robert J Bartz guides IT and networking professionals through the fundamental and advanced concepts of mobile computing providing the information and instruction necessary to get up to speed on current technology and best practices The book maps to the CompTIA Mobility MB0 001 exam making it an ideal resource for those seeking this rewarding certification The mobile device has already overshadowed the PC as a primary means for Internet access for a large portion of the world's population and by 2020 there will be an estimated 10 billion mobile devices worldwide Mobile connectivity has become the new standard for business professionals and when combined with cloud computing it creates a world where instant access is the norm To remain relevant IT professionals must hone their mobile skills The ability to manage develop and secure a mobile infrastructure is quickly becoming a key component to entering the IT industry and professionals lacking those skills will be left behind This book covers all aspects of mobile computing including Radio frequency antenna and cellular technology Physical and logical infrastructure technologies Common mobile device policies and application management Standards and certifications and more Each chapter includes hands on exercises real world examples and in depth guidance from the perspective of a mobile computing expert IT professionals looking to expand their capabilities need look no further than Mobile Computing Deployment and Management Real World Skills for CompTIA Mobility Certification and Beyond for the most comprehensive approach to mobile computing on the market today

Computational Intelligence in Machine Learning Vinit Kumar Gunjan, Amit Kumar, Jacek M. Zurada, Sri Niwas Singh, 2024-02-20 This volume comprises select proceedings of the International Conference on Computational Intelligence in Machine Learning ICCIML 2022 The contents cover latest research trends and developments in the areas of machine learning smart cities IoT Artificial Intelligence cyber physical systems cybernetics data science neural network cognition among others It also addresses the comprehensive nature of computational intelligence AI ML and DL to emphasize its character in modelling identification optimization prediction forecasting and control of future intelligent systems This volume will be a useful guide to those working as researchers in academia and industry by presenting in depth fundamental research contributions from a methodological application perspective in understanding Artificial intelligence and machine learning approaches and their capabilities in solving diverse range of problems in industries and its real world applications

Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics Khosrow-Pour, D.B.A., Mehdi, 2018-10-19 From cloud computing to data analytics society stores vast supplies of information through wireless networks and mobile computing As organizations are becoming increasingly more wireless ensuring the security and seamless function of electronic gadgets

while creating a strong network is imperative

Advanced Methodologies and Technologies in Network Architecture Mobile Computing and Data Analytics highlights the challenges associated with creating a strong network architecture in a perpetually online society Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data This book is an important resource for information technology professionals software developers data analysts graduate level students researchers computer engineers and IT specialists seeking modern information on emerging methods in data mining information technology and wireless networks Adaptive Mobile Computing Mauro Migliardi,Alessio Merlo,Sherenaz Al-HajBaddar,2017-08-14 Adaptive Mobile Computing Advances in Processing Mobile Data Sets explores the latest advancements in producing processing and securing mobile data sets The book provides the elements needed to deepen understanding of this trend which over the last decade has seen exponential growth in the number and capabilities of mobile devices The pervasiveness sensing capabilities and computational power of mobile devices have turned them into a fundamental instrument in everyday life for a large part of the human population This fact makes mobile devices an incredibly rich source of data about the dynamics of human behavior a pervasive wireless sensors network with substantial computational power and an extremely appealing target for a new generation of threats Offers a coherent and realistic image of today s architectures techniques protocols components orchestration choreography and development related to mobile computing Explains state of the art technological solutions for the main issues hindering the development of next generation pervasive systems including supporting components for collecting data intelligently handling resource and data management accounting for fault tolerance security monitoring and control addressing the relation with the Internet of Things and Big Data and depicting applications for pervasive context aware processing Presents the benefits of mobile computing and the development process of scientific and commercial applications and platforms to support them Familiarizes readers with the concepts and technologies that are successfully used in the implementation of pervasive ubiquitous systems

Advanced Smart Computing Technologies in Cybersecurity and Forensics Keshav Kaushik,Shubham Tayal,Akashdeep Bhardwaj,Manoj Kumar,2021-12-15 This book addresses the topics related to artificial intelligence the Internet of Things blockchain technology and machine learning It brings together researchers developers practitioners and users interested in cybersecurity and forensics The first objective is to learn and understand the need for and impact of advanced cybersecurity and forensics and its implementation with multiple smart computational technologies This objective answers why and how cybersecurity and forensics have evolved as one of the most promising and widely accepted technologies globally and has widely accepted applications The second objective is to learn how to use advanced cybersecurity and forensics practices to answer computational problems where confidentiality integrity and availability are essential aspects to handle and answer This book is structured in such a way so that the field of study is relevant to each reader s major or interests It aims to help each reader see the relevance of cybersecurity and forensics to their career or

interests This book intends to encourage researchers to develop novel theories to enrich their scholarly knowledge to achieve sustainable development and foster sustainability Readers will gain valuable knowledge and insights about smart computing technologies using this exciting book This book Includes detailed applications of cybersecurity and forensics for real life problems Addresses the challenges and solutions related to implementing cybersecurity in multiple domains of smart computational technologies Includes the latest trends and areas of research in cybersecurity and forensics Offers both quantitative and qualitative assessments of the topics Includes case studies that will be helpful for the researchers Prof Keshav Kaushik is Assistant Professor in the Department of Systemics School of Computer Science at the University of Petroleum and Energy Studies Dehradun India Dr Shubham Tayal is Assistant Professor at SR University Warangal India Dr Akashdeep Bhardwaj is Professor Cyber Security Digital Forensics at the University of Petroleum Energy Studies UPES Dehradun India Dr Manoj Kumar is Assistant Professor SG SoCS at the University of Petroleum and Energy Studies Dehradun India

Sustaining Mobile Learning Wan Ng, Therese M. Cumming, 2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education For learners they offer an appealing opportunity to transcend teacher defined knowledge and approaches by being able to access multiple alternative sources of information anytime and anywhere While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade there is no consolidated view of how to sustain the practices or opportunities that are being explored Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies time and training to initiate mobile learning programs The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies where with every change new possibilities are opened up and investments required In addition educators are still attempting to reconcile institutions of formal education with informal mobile learning The book addresses these issues with a particular focus on exploring the challenges surrounding the sustainability of mobile learning in K 12 and higher education investigating the importance of sustaining mobile learning for diverse populations of students globally discussing theoretical models for the sustainability of mobile learning providing the reader with strategies for sustaining mobile learning Presenting new research alongside theoretical models and ideas for practice the book will appeal to researchers academics and postgraduate students in the fields of education and mobile learning as well as those working in teacher education
