Calling for the Super Citizen Elisabeth Badenhoop,2023-07-31 This book offers the first empirical and holistic analysis of the design implementation and effects of the new naturalisation regimes in the United Kingdom and Germany introduced in the 2000s Based on a multi sited state ethnography it uniquely compares the law on the books the local administration and the lived experiences of citizenship tests courses and ceremonies from an interdisciplinary social science perspective The book argues that naturalisation procedures in both countries suggest to migrants to constantly optimise themselves in the state s interests toward the subjectivity of the Super Citizen a political economic and cultural asset to the liberal democratic capitalist nation state The concept of the Super Citizen enables us to highlight and criticise the overburdening expectations toward citizens by application as opposed to citizens by birth The analysis reveals that the self presentation of Britain and Germany as liberal and meritocratic polities is in stark contrast to migrants lived experiences of the naturalisation process By shedding light on naturalisation policies efficacy this book is aimed at students and scholars in sociology politics law anthropology and education as well as policy makers in the areas of citizenship and migration
