Broadband Microstrip Antennas Girish Kumar,K. P. Ray,2003 Microstrip antennas are lightweight and small volume can be made conformal to the host surface and are manufactured using printed circuit technology so can be mass produced at low cost but alas say Kumar and Ray Indian Institute of Technology Bombay their use has been restricted by their inherently narrow bandwidth Over the past few decades however reports have surfaced of broadband configurations and they detail the most promising compiling material from scattered journals conference proceedings and books They explain concepts of several techniques and describe examples without bogging down in mathematical detail Annotation copyrighted by Book News Inc Portland OR

Compact and Broadband Microstrip Antennas Kin-Lu Wong,2004-03-24 Compact microstrip antennas are of great importance in meeting the miniaturization requirements of modern portable communications equipment This book is a comprehensive treatment of design techniques and test data for current compact and broadband microstrip designs Summarizes the work of the author and his graduate students who have published over 80 refereed journal articles on the subject in the past few years Advanced designs reported by various other prestigious antenna designers are incorporated as well

Microstrip Antennas David M. Pozar,Daniel H. Schaubert,1995-05-15 This anthology combines 15 years of microstrip antenna technology research into one significant volume and includes a special introductory tutorial by the co editors Covering theory design and modeling techniques and methods this source book is an excellent reference tool for engineers who want to become more familiar with microstrip antennas and microwave systems Proven antenna designs novel solutions to practical design problems and relevant papers describing the theory of operation and analysis of microstrip antennas are contained within this convenient reference

Microstrip Antenna Design Handbook Ramesh Garg,2001 Based on Bahl and Bhartia's popular 1980 classic *Microstrip Antennas* this all new book provides the detail antenna engineers and designers need to design any type of microstrip antenna After addressing essential microchip antenna theory the authors highlight current design and engineering practices emphasizing the most pressing issues in this area including broadbanding circular polarization and active microstrip antennas in particular Special design challenges ranging from dual polarization high bandwidth and surface wave mitigation to choosing the proper substrate and shaping an antenna to achieve desired results are all covered

Investigation of Broadband Microstrip Antenna Structures for Application in Monolithic Millimeter Wave Arrays David C. Chang,E. F. Kuester,COLORADO UNIV AT BOULDER DEPT OF ELECTRICAL AND

COMPUTER ENGINEERING.,1989 Our studies have shown the development of several ways of accurately yet efficiently modelling the behavior of closely spaced microstrip antenna elements The accuracy has been verified by comparison with brute force numerical procedures and thus suggests that wideband microstrip antennas should be designable with much less difficulty than previously believed Further both experimental and numerical evidence has been obtained for the proposition that wider bandwidth and even lower frequency operation of a microstrip patch antenna element can be achieved by arranging many closely coupled narrow strip dipoles together in an appropriate way We are far from a complete understanding of these effects especially there has been no study of the frequency dependence of the radiation properties of these new elements Design and optimization of them is also in a very primitive stage as accurate modeling of their properties requires numerically intensive methods at this time Questions of this nature deserve more investigation RRH A New Broadband Microstrip Antenna Design for Wireless Communications Amer Hassib Bzeih,2006 One of the most critical parameters in antenna systems is the bandwidth A narrow bandwidth is a major disadvantage of microstrip antennas in practical applications For present day wireless communication systems the required operating bandwidths for antennas are about 7.6% for a Global System for Mobile Communications GSM 9.5% for a Digital Cellular System DCS 7.5% for a Personal Communications Service PCS and 12.2% for a Universal Mobile Telecommunications System UMTS To meet these bandwidth requirements many bandwidth enhancement or broadband techniques for microstrip antennas have been reported recently This thesis presents EEPA the Enhanced E Patch Antenna for the usage in a wide range of wireless communications frequency ranges The antenna parameters are optimized to achieve a target wide bandwidth The EEPA is designed simulated fabricated and tested where it can be used in DCS PCS UMTS Wi-Fi 802.11 b/g Bluetooth 802.15 and WiMax 802.16 d Moreover the antenna design parameters are empirically formulated and followed by a validation procedure Also this thesis presents a new microstrip patch antenna design model the Multi Parallel Slots Microstrip Patch Antenna MPSMPA The antenna is designed and simulated for different scenarios 4 slots 6 slots and 8 slots A 57% bandwidth is achieved in the 8 slots design The antenna can be utilized in many wireless communications standards such as DCS PCS UMTS Wi-Fi 802.11 b/g WiMax 802.16 d and MMDS Multichannel Multipoint Distribution Service **Methodically Designed Broadband Microstrip Antennas** Hassan Elkamchouchi,Gehan Abouelseoud,2024-06-09 This book which is based on a PhD dissertation describes innovative intelligent antenna designs The proposed antennas can indeed be thought of as intelligent based on two points of view First their synthesis procedures are systematic unlike the prevalent synthesis procedures nowadays which mainly depend on cut and try procedures using the help of powerful computational electromagnetics simulation techniques Second their fabrication depends on simple procedure and makes use of cheap offshelf components The designs were published in international conferences and Q1 periodicals
