Broadcasting Politics in Japan Ellis S. Krauss, 2018-09-05 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation Between 1960 and 1990 however these institutions renewed their strength taking on legitimacy that erased virtually all traces of their postwar instability How did this transformation come about This is the question Ellis S Krauss ponders in *Broadcasting Politics in Japan* his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster NHK Since the 1960s television has been a fixture of the Japanese household and NHK's TV news has until very recently been the dominant and most trusted source of political information for the Japanese citizen NHK's news style is distinctive among the broadcasting systems of industrialized countries it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy Krauss argues that this approach is not simply a reflection of Japanese culture but a result of the organization and processes of NHK and their relationship with the state These factors had profound consequences for the state's postwar re-legitimization while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state Krauss guides the reader through the complex interactions among politics media organizations and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world rather than simply a lens through which to view it Media and Politics in Japan

Susan Pharr, Ellis S. Krauss, 1996-03-01 Japan is one of the most media saturated societies in the world The circulations of its big five national newspapers dwarf those of any major American newspaper Its public service broadcasting agency NHK is second only to the BBC in size And it has a full range of commercial television stations high brow and low brow magazines and a large anti-mainstream media and mini media Japanese elites rate the mass media as the most influential group in Japanese society But what role do they play in political life Whose interests do the media serve Are the media mainly servants of the state or are they watchdogs on behalf of the public And what effects do the media have on the political beliefs and behavior of ordinary Japanese people These questions are the focus of this collection of essays by leading political scientists sociologists social psychologists and journalists Japan's unique kisha press club system its powerful media business organizations the uses of the media by Japan's wily bureaucrats and the role of the media in everything from political scandals to shaping public opinion are among the many subjects of this insightful and provocative book

Technology, Television, and Competition Jeffrey A. Hart, 2004-02-05 In the late 1980s and 1990s the advanced industrial countries considered replacing the existing analogue television infrastructure with a new digital one A key common feature to the debates over digital TV DTV in the United States Western Europe and Japan was the eventual victory of the ideas of digitalism the superiority of everything digital over everything analogue and of digital convergence the merging of computing telecommunications and broadcasting infrastructures made possible by digitalization in public debates over

standards Jeffrey Hart's book shows how nationalism and regionalism combined with digitalism to produce three different and incompatible DTV standards in the three regions an outcome which has led to missed opportunities in developing the new technologies Hart's book contributes to our understanding of relations between business and government and of competition between the world's great economic powers

The Politics of Public Broadcasting in Britain and Japan

Henry Laurence, 2022-07-29 The BBC and NHK have dominated their national media systems since the 1920s and still play a central role in shaping political social and cultural life Both are highly trusted news organizations and vitally influence national identity Yet despite remarkably similar organizational and funding structures they differ in their editorial autonomy relationship to the state and in the social and cultural roles they play While the BBC proud of its independence acts as a watchdog on the powerful NHK prefers a guide dog role cooperating with rather than confronting political elites The BBC is also more willing to challenge prevailing social norms often serving as an agent of social change NHK prefers to avoid controversy serving as an agent of social stability The book argues that these differences were shaped by decades of conflict and cooperation between broadcasters governments commercial media interest groups and audiences The broadcasters adopted distinctive editorial strategies to retain public support and elite approval in the face of technological upheaval hostility from commercial rivals and continuous political interference Both however continue to uphold the belief that democratic and social goals are better served by public rather than commercial media

Television, Regulation and Civil Society in Asia

Philip Kitley, 2003-08-29 This highly topical book exposes the tensions between state policies of broadcasting regulation and practices of civil society in the Asian region which is struggling with its incorporation into a new globalised electronic information and entertainment world Kitley critically compares Western principles of broadcasting civil society and cultural regulation with alternative Asian practices of regulation and organisation Over the past forty years Asian states have used television as a normative cultural force in nation building but more recently many states have deregulated their television sectors and introduced national commercial and international satellite services As Asian states wrestle with a perceived loss of cultural control and identity through deregulation this book considers their viewpoints and the question of whether the television public sphere offers space for the representation of popular sovereignty and transversal concerns about human rights press freedom gender environmental and world trade issues
