Scholarly Collaboration on the Academic Social Web Daqing He, Wei Jeng, 2022-05-31 Collaboration among scholars has always been recognized as a fundamental feature of scientific discovery The ever increasing diversity among disciplines and complexity of research problems makes it even more compelling to collaborate in order to keep up with the fast pace of innovation and advance knowledge Along with the rapidly developing Internet communication technologies and the increasing popularity of the social web we have observed many important developments of scholarly collaboration on the academic social web In this book we review the rapid transform of scholarly collaboration on various academic social web platforms and examine how these platforms have facilitated academics throughout their research lifecycle from forming ideas collecting data and authoring articles to disseminating findings We refer to the term academic social web platforms in this book as a category of Web 2.0 tools or online platforms such as

CiteULike Mendeley Academia.edu and ResearchGate that enable and facilitate scholarly information exchange and participation. We will also examine scholarly collaboration behaviors including sharing academic resources, exchanging opinions, following each other's research, keeping up with current research trends, and most importantly, building up their professional networks. Inspired by the model developed by Olson et al. (2000) on factors for successful scientific collaboration, our examination of the status of scholarly collaboration on the academic social web has four emphases: technology readiness, coupling work, building common ground, and collaboration readiness. Finally, we talk about the insights and challenges of all these online scholarly collaboration activities imposed on the research communities who are engaging in supporting online scholarly collaboration. This book aims to help researchers and practitioners understand the development of scholarly collaboration on the academic social web and to build up an active community of scholars who are interested in this topic.
