Environmental Literacy Frank B. Golley,1998 Presents key concepts of environmental science in a style that can be understood by those who are not scientists **A Primer on Environmental Sciences** Matthew N. O. Sadiku,Uwakwe C.

Chukwu,Olaniyi D. Olaleye,2022-02-09 In a modern society it is easy to forget that our society depends largely on the environmental processes that govern our world Environment refers to an aggregate of surroundings in which living beings such as humans animals and plants live and non living things exist It includes air water land living organisms and materials surrounding us The environment is an important part of our daily lives Environmental issues are now part of every career path and employment area Environmental science is an interdisciplinary field that applies principles from all the known technologies and sciences to study the environment and provide solutions to environmental problems It is the study of how the earth works and how we can deal with the environmental issues we face There is an ever demanding need for experts in this field because the environment is responsible for making our world beautiful and habitable For this reason environmental science is now being taught at high schools and higher institutions of learning Education on environmental science will empower the youths to take an active role in the world in which they live **Envisioning Environmental Literacy** Wei-Ta

Fang,2020-07-22 This book bridges the gap between two critical issues environmental literacy and social norms and explores various topics and case studies from Sinophone and Taiwanese perspectives Each chapter includes extensive information on pro environmental behaviors and on people with working experiences home experiences and actual philosophies in their daily lives In keeping with the Sustainable Development Goals SDGs this book highlights our potential to contribute to social inclusion and environmental protection and offers a comprehensive guide for scholars students practitioners and entrepreneurs in environmental education and related disciplines **Environmental Literacy in Science and Society**

Roland W. Scholz,Claudia R. Binder,2011-07-21 In an era where humans affect virtually all of the earth s processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth s ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human

environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century *Environmental History in the Making* Estelita Vaz, Cristina Joanaz de Melo, Lúcia M. Costa Pinto, 2016-10-13 This book is the product of the 2nd World Conference on Environmental History held in Guimarães Portugal in 2014 It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future It reveals how our cultural background and examples of past territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions Considering that political ideologies such as socialism and capitalism as well as religion fail to offer global paradigms for common ground an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors real or invented and avoid repeating ecological loss Therefore agency environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political cultural and economic interests in the public arena This book intertwines reflections on our bonds with landscapes processes of natural and scientific transfer across the globe the changing of ecosystems the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it in today's world can offer alternatives that avoid harming those same vital natural resources water soil and air In addition it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached from technical intervention in the world In short the book firstly studies the past approaching it as a data set of how the environment has shaped culture secondly seeks to understand the present and thirdly assesses future perspectives what to keep what to change and what to dream anew considering that conventional solutions have not sufficed to protect life on our planet Ecomedia Literacy Antonio Lopez, 2020-11-29 This book offers a focused and practical guide to integrating the relationship between media and the environment ecomedia into media education It enables media teachers to green their pedagogy by providing essential tools and approaches that can be applied in the classroom Media are essential features of our planetary ecosystem emergency contributing to both the problem of and solution to climate chaos biodiversity loss ocean acidification deforestation water contamination and so on Offering a clear theoretical framework and suggested curriculum guide the book provides key resources that will enable media educators to apply ecomedia concepts to their curricula By reconceptualizing media education this book connects ecology environmental communication ecomedia studies environmental humanities and ecoliteracy to bridge media literacy and education for sustainability Ecomedia Literacy is an essential read for educators and scholars in the areas of media literacy media and communication media and cultural studies environmental humanities and environmental studies Environmental Connections Kathleen Bajorek DeBettencourt, 2000 A guide intended to help educators and students find resources on environmental topics that will enable them to examine

issues in greater depth than typical textbooks allow Chapters are divided by subject matter water biodiversity air quality global climate change energy forests food and agriculture soils mineral resources population studies waste management toxicology and risk and environmental decision making Guide appears to be most helpful for teachers in upper grade levels
