Parlier, Begoña

Vitoriano, 2015-12-14 This book constitutes revised selected papers from the 4th International Conference on Operations Research and Enterprise Systems ICORES 2015 held in Lisbon Portugal in January 2015 The 14 papers presented in this volume were carefully reviewed and selection from a total of 89 submissions They were organized in topical sections named methodologies and technologies and applications **Multicriteria Location Analysis** H. A. Eiselt, Vladimir

Marianov, Joyendu Bhadury, 2023-03-01 This book applies Multicriteria Decision Making MCDM tools and techniques to problems in location analysis It begins with a generic model for MCDM and subsequently develops specific versions of the technique for particular location problems Throughout the book MCDM is understood to encompass all tools and techniques that choose or rank existing or feasible solutions including discrete multi attribute decision making MADM problems which typically include an attribute table that specifies the consequences of each decision with regard to the given criteria as well as multi objective linear problems MOLPs which incorporate all objectives in a single optimization problem The book is organized as follows the first four chapters introduce readers to the basic tools and techniques used in single objective optimization multicriteria decision making location analysis and other tools such as statistical regression and geographical information systems This is followed by ten chapters on model applications each of which introduces readers to a specific location problem and applies one technique to solve it The book is then wrapped up in a closing chapter that looks at the location process from a practitioner s point of view This book is intended as a textbook for upper undergraduate and master

level courses on location analysis It will also benefit decision makers who actually need to locate facilities **Soft Computing for Sustainability Science** Carlos Cruz Corona,2017-07-12 This book offers a timely snapshot of soft computing methodologies and their applications to various problems related to sustainability including electric energy consumption fault diagnosis vessel fuel consumption determining the best sites for new malls maritime port projects and ad hoc vehicular networks Further it demonstrates how metaheuristics and machine learning methods fuzzy linear programming neural networks computing with words linguistic models and other soft computing methods can be efficiently used to solve real world problems Intended as a practice oriented guide for students researchers and professionals working at the interface between computer science industrial engineering naval engineering agriculture and sustainable development climate change research it provides readers with a set of intelligent solutions helping them answer a range of emerging questions related to sustainability

Foundations of Location Analysis H. A. Eiselt,Vladimir Marianov,2011-01-13 Location analysis has matured from an area of theoretical inquiry that was designed to explain observed phenomena to a vibrant field which can be and has been used to locate items as diverse as landfills fast food outlets gas stations as well as politicians and products in issue and feature spaces Modern location science is dealt with by a diverse group of researchers and practitioners in geography economics operations research industrial engineering and computer science Given the tremendous advances location science has seen from its humble beginnings it is time to look back The contributions in this volume were written by eminent experts in the field each surveying the original contributions that created the field and then providing an up to date review of the latest contributions Specific areas that are covered in this volume include The three main fields of inquiry minimax and minimax problems and covering models Nonstandard location models including those with competitive components models that locate undesirable facilities models with probabilistic features and problems that allow interactions between facilities Descriptions and detailed examinations of exact techniques including the famed Weiszfeld method and heuristic methods ranging from Lagrangean techniques to Greedy algorithms A look at the spheres of influence that the facilities generate and that attract customers to them a topic crucial in planning retail facilities The theory of central places which other than in mathematical games where location science was born

Proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics 2022 Aboul Ella Hassanien,Václav Snášel,Mincong Tang,Tien-Wen Sung,Kuo-Chi Chang,2022-11-17 This proceedings book constitutes the refereed proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics AISI 2021 which took place in Cairo Egypt during November 20 22 2022 and is an international interdisciplinary conference that presents a spectrum of scientific research on all aspects of informatics and intelligent systems technologies and applications

Operations Research/Management Science at Work Erhan Kozan,Azuma Ohuchi,2012-12-06 The principle aim of this book entitled Operations Research/Management Science at Work is to provide a summary snapshot of recent research in and applications of

Operations Research OR Management Science MS in the Asia pacific region The book emphasises research having potential industry interest covering a wide range of topics from major fields of ORIMS in a systematic and coherent fashion and shows the elegance of their implementations The book is intended to serve the needs of applied researchers who are interested in applications of ORIMS algorithms The book includes descriptions of many real world problems together with their solutions we hope the reader will appreciate their applicability The Asia pacific region has embraced business applications of decision support systems in recent years Given that many of these applications are unaffected by legacy models or systems it has meant that state of the art ORIMS techniques have been embedded in them Moreover the increased use of OR MS techniques in this region provides opportunities for identifying methodological advances that are taking place as a result of the unique nature of the applications These also provide opportunities for exploring synergies and interfaces that exist between OR MS from the point of view of applications as well as theoretical advances
