Beyond Capital Computing Routledge Sociology:

Beyond Capital David Hakken, Maurizio Teli, Barbara Andrews, 2015-10-23 The financial social cataclysm beginning in 2007 ended notions of a great moderation and the view that capitalism had overcome its systemic tendencies to crisis The subsequent failure of contemporary social formations to address the causes of the crisis gives renewed impetus to better analysis in aid of the search for a better future This book contributes to this search by reviving a broad discussion of what we humans might want a post capitalist future to be like It argues for a comparative anthropological critique of capital notions of value thereby initiating the search for a new set of values as well as identifying a number of selected computing practices that might evoke new values It articulates a suggestive set of institutions that could support these new values and formulates a group of measurement practices usable for evaluating the proposed institutions The book is grounded in contemporary social science political theory and critical theory It aims to leverage the possibility of alternative futures implied by some computing practices while avoiding hype and technological determinism and uses these computing practices to explicate one possible way to think about the future

The Reflexive Initiative Stanley Raffel, Barry Sandywell, 2016-03-31 The Reflexive Initiative is an authoritative intervention in the practice and tradition of reflexive social theory It demonstrates the importance of the reflexive imperative not only in the investigation of everyday life but across a wide range of human sciences and philosophical perspectives Forty years after the publication of *On the Beginning of Social Inquiry* the chapters in this collection range from re appraisals of earlier essays on topics such as reunions rethinking art and expats to contributions emphasising the opening of radical dialogues with other reflexive traditions and perspectives These include psychoanalysis Lacan Hegel Rene Girard Daseinanalysis dialectical method critical feminism and the dialogical tradition In this dialogical spirit the book contributes to the continuing project of analytic theorizing associated with the work of Alan Blum and Peter McHugh and the recent turn to more existential topics and politically engaged forms of reflexive research It will be of particular use to students working in interpretive traditions of sociology Critical theory Postmodern thought and debates associated with reflexivity and dialectics in other disciplines and research programmes

range of experts across Europe including the UK Belgium the Netherlands Italy Denmark Austria Spain France Romania Hungary and Finland

Challenging Identities Peter Madsen, 2016-08-12 Identity is a keyword in a number of academic fields as well as in public debate and in politics During the last decades references to identity have proliferated yet there is no simple definition available that corresponds to the use of the notion in all contexts The significance of the notion depends on the conceptual or ideological constellation in which it takes part This volume on one hand demonstrates the role of notions of identity in a variety of European contexts and on the other hand highlights how there may be reasons to challenge the use of the term and corresponding social cultural and political practices Notions of national identity and national politics are challenged by European integration as well as by the increasing demographic heterogeneity due to migration and migrants experience conflicts of identification stemming from clashes between cultural heritage and the cultures of the new habitat European horizons frames of mind historical memories and expectations at the level of groups or communities at the national level and at the general European level are at odds Analyzing a series of issues in European countries from Turkey to Spain and from Scandinavia to the Balkans the contributions demonstrate uses and abuses of the notion of identity
