Curwell, Mark Deakin, Martin Symes, 2005 This second title of a three volume series based on research by the influential BEQUEST network examines the methodology of environmental assessment providing unique insight into critical aspects to sustainable urban development

Language, Capital, Culture , 2007-01-01 Singapore has been taken by many researchers as a fascinating living language policy and planning laboratory Language and education policy in Singapore has

been pivotal not only to the establishment and growth of schooling but to the very project of nation building. Since their inception, mother tongue policies have been established with two explicit goals. Firstly, there is the development and training of human and intellectual capital for the expansion and networking of a Singaporean service and information economy. Secondly, there is the maintenance of cultural heritage and values as a means for social cohesion and indeed the maintenance of community and regional social capital. These tasks have been fraught with tension and contradiction both in relation to the conditions of rapid cultural, economic and political change in Asia and globally but as well because of the tensions between the so-called world language, English, and Singapore's three other official languages, Tamil, Malay, and Mandarin. This has been complicated of course by the challenges of vibrant regional dialects and the emergence of Singlish as a powerful medium of community life.

After the Storm Jomo Kwame Sundaram, 2004. After the Storm discusses restructuring and growth strategies adopted in Indonesia, Malaysia, Thailand, and South Korea after the currency and financial crisis of 1997-98. These four Asian economies were the most adversely affected despite achieving rapid growth in the 1970s and 1980s with low inflation and current account surpluses. Although macroeconomic fundamentals in these countries were relatively sound prior to the crisis, early analyses of the crisis dwelled on the failure of corporate governance, currency controls, and immature financial institutions and infrastructure in some countries. The book offers fresh insights into the causes of the crisis and postcrisis restructuring, the growth strategies adopted, and domestic initiatives taken by these countries. It also reveals why reforms recommended by the IMF, World Bank, and others were met with resistance, thereby contributing to the ongoing discourse on the effects of globalisation.

Handbook of Business Practices and Growth in Emerging Markets Satyendra Singh, 2010. The Handbook of Business Practices and Growth in Emerging Markets consists of a collection of specially commissioned chapters that describe the current business environment, organizational culture, consumer behavior, financial investment climate, and examples of best prevailing practices in emerging markets. It covers all the major functional areas of business: marketing, strategy, operations, and finance in all continents. The focus of each chapter is on the identification of different business issues in different emerging markets, including Asia, Africa, and South America, and on the implementation of a proposed set of recommendations using both qualitative and quantitative techniques to assist in decision making and in improving organizational efficiency and effectiveness. Readers will also appreciate the multidimensional view of financial and non-financial performance measurement of businesses. Specifically, the goal of this research-based handbook is to provide a comprehensive guide for business students and managers by discussing a range of issues from the diverse emerging markets and enabling them to develop a strategic mindset for a market-oriented culture. Given the changing business dynamics, government policies, and demands in industries, this handbook is both timely and topical.

Parceling the Globe, 2008-01-01. Parceling the Globe is a study in the processes of global democracy. It offers an early answer to the question regarding our responsibility to others. Through its organization, it presents a partial understanding of the

globalization process It determines the range of global behaviors and articulates the prospects for peace in a globalizing environment
