**Immobilized  $\beta$ -Galactosidase-Mediated Conversion of Lactose: Process, Kinetics and Modeling Studies** Fadzil Noor Gonawan,2019-01-07 This book describes the reaction rate profiles of the galactosidase catalyzed conversion of lactose on the inner surface of a hollow fiber membrane which is employed as an enzymatic reactor system The reaction rate profiles were obtained by solving the mass transfer and kinetics of reaction in a 2 dimensional model of the system The primary challenge of this research was to develop the kinetic model of the reaction to describe the

kinetic behavior as the reaction occurred on the membrane surface Despite the difficulties the proposed model can reliably replicate the actual process as validation procedures have confirmed The reaction rates obtained analyze the performance of the immobilized enzyme on the membrane surface Previously an increase in performance of galactosidase catalyzed conversion of lactose assisted by ultrafiltration was suggested due to inhibitor removal However as the analysis presented here shows the concentration profile of the substrate on the membrane surface also affects the reaction performance
