Polymers in Medicine Emo Chiellini, Paolo Giusti, 2013-03-09 This book contains the collected papers presented at the International Symposium on Polymers in Medicine Biomedical and Pharmaceutical Applications which was held at Porto Cervo Italy May 24 28 1982 To the best of our knowledge this symposium was the first to be organized in Italy entirely devoted to the several aspects of the

use of synthetic and semisynthetic macromolecular materials in the field of biomedical and pharmacological applications The intention of the Organizing Committee of the symposium was the promotion of a scientific and cultural initiative to gain the attention of various experts in line research of the potential of suitably designed man made polymeric materials in biomedical applications With highly qualified and worldwide attendance the above goal was fully satisfied Indeed the opportunity of meeting together in a well conceived and discreet corner of the world scientists with different cultural backgrounds and objectives helped extend the meaning of the symposium far beyond the Italian borders and the perspectives of the National Research Council of Italy CNR the major sponsor of the meeting

Applied Bioactive Polymeric Materials Charles Gebelein, 2013-11-21 The biological and biomedical applications of polymeric materials have increased greatly in the past few years This book will detail some but not all of these recent developments There would not be enough space in this book to cover even lightly all of the major advances that have occurred Some earlier books and summaries are available by two of this book's Editors Gebelein Polymeric Materials In Medication Plenum 1985 Biological Activities of Polymers American Chemical Society 1982 Of these three Bioactive Polymeric Systems should be the most useful to a person who is new to this field because it only contains review articles written at an introductory level The present book primarily consists of recent research results and applications with only a few review or summary articles Bioactive polymeric materials have existed from the creation of life itself Many firmly believe that life could not even exist unless polymeric materials are used to form the basic building blocks Although this assumption can not be rigorously proven it is a fact that most if not all of the major biochemical pathways involve polymeric species such as the proteins including enzymes polysaccharides and nucleic acids
