Allen, 2012-12-06 Twenty five years is a considerable time span in the life of any scientific discipline certainly in this twentieth century when development is so rapid For the science of adhesion and the technology of adhesives this is particularly true For these the immediately past quarter century might be compared with the Renaissance when all the civilised world was alight with the new learning Certainly it has been a period of immense advance both of understanding and of application in this an a of scientific endeavour It was in the light of this situation that here at City University we set about arranging the Twenty fifth Annual Conference on Adhesion and Adhesives of which this volume presents the proceedings A total of seventeen papers from seven countries covering a span of topics from organic chemistry through physical chemistry and physics to engineering Truly this Conference has come of age and is acknowledged as the annual international venue for the consideration of adhesion in all its diversity It is our earnest hope and intention that it shall continue for many more years May I express my personal gratitude to all those who make the event possible the audiences as well as the speakers all those in the University who help in various ways and the publishers who make it possible for you the wider audience to have these proceedings

Adhesion and Adhesives Anthony J. Kinloch, 2012-12-06 Over the last decade or so the growth in the use of adhesives especially in ever more technically demanding applications has been rapid and many major developments in the technology of adhesives have been reported This growth has also led to attention being focused on somewhat more basic studies of the science of adhesion and adhesives and in recent years our level of fundamental knowledge concerning the formation and mechanical performance of adhesive joints has increased dramatically Such studies have of course been aided greatly by the development of the tools at the disposal of the investigators For example specific surface analytical techniques such as X ray photoelectron and secondary ion mass spectroscopy and the increasingly sophisticated methods of stress analysis and fracture mechanics have been put to good use in furthering our understanding of the science of adhesion and adhesives The present book attempts to review the multidisciplined subject of adhesion and adhesives considering both the science and technology involved in the formation and mechanical performance of adhesive joints The author would like to thank his friends and colleagues for useful discussions and help in the preparation of this book I am particularly grateful to P Cawley J Comyn W A Lees A C Roulin Moloney W C Wake J G Williams and R J Young who have read and commented on various chapters and P Farr for preparing the diagrams
