Revolutionizing Aircraft Materials and Processes Spiros Pantelakis,Konstantinos Tserpes,2020-03-11 This book addresses the emerging needs of the aerospace industry by discussing recent developments and future trends of aeronautic materials It is aimed at advancing existing materials and fostering the ability to develop novel materials with less weight increased mechanical properties more functionality diverse manufacturing methods and recyclability The development of novel materials and multifunctional materials has helped to increase efficiency and safety reduce costs and decrease the environmental foot print of the aeronautical industry In this book integral metallic structures designed by disruptive concepts including topology optimization and additive manufacturing are highlighted *Aeronautical Engineering* ,1985 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA *Sandwich Structures 7: Advancing with Sandwich Structures and Materials* O.T. Thomsen,E.

Bozhevolnaya,A. Lyckegaard,2006-01-16 Sandwich structures represent a special form of a laminated composite material or structural elements where a relatively thick lightweight and compliant core material separates thin stiff and strong face sheets The faces are usually made of laminated polymeric based composite materials and typically the core can be a honeycomb type material a polymeric foam or balsa wood The faces and the core are joined by adhesive bonding which ensures the load transfer between the sandwich constituent parts The result is a special laminate with very high bending stiffness and strength to weight ratios Sandwich structures are being used successfully for a variety of applications such as spacecraft aircraft train and car structures wind turbine blades boat ship superstructures boat ship hulls and many others The overall objective of the 7th International Conference on Sandwich Structures ICSS 7 is to provide a forum for the presentation and discussion of the latest research and technology on all aspects of sandwich structures and materials spanning the entire spectrum of research to applications in all the fields listed above
