# What is Boiling Point?

The boiling point is the temperature at which a substance transitions from its liquid state to its gaseous state.

At this temperature, the vapor pressure of the liquid equals the atmospheric pressure, causing the liquid to boil.

It is a characteristic property unique to each substance and depends on factors like atmospheric pressure.

Boiling points vary widely; for example, water boils at 100 degrees Celsius (212 degrees Fahrenheit) at standard atmospheric pressure. Understanding boiling points is essential in fields like chemistry and cooking, influencing processes such as distillation and food preparation.

Chemical Metallurgy J.J. Moore, 2013-10-22 Chemical Metallurgy Second Edition provides the fundamental chemical principles and demonstrates the application of these principles to process metallurgy materials synthesis and processing and corrosion protection The book consists of nine chapters The first five chapters emphasize the fundamental chemical principles involved in metallurgical reactions An additional chapter on slag chemistry has also been added in this second edition in order to provide a more thorough understanding of slag metal reactions. The final three chapters focus on the applications of the chemical principles to the extraction and refining of metals metal melting and recycling and metallic corrosion The book will be of value to materials students and teachers and scientists and engineers entering employment in the metallurgical and materials processing and metal finishing industries Handbook of Natural Gas Analysis James G. Speight, 2018-07-02 A comprehensive resource to the origin properties and analysis of natural gas and its constituents Handbook of Natural Gas Analysis is a comprehensive guide that includes information on the origin and analysis of natural gas the standard test methods and procedures that help with the predictability of gas composition and behavior during gas cleaning operations and use The author a noted expert on the topic also explores the properties and behavior of the various components of natural gas and gas condensate All chapters are written as stand alone chapters and they cover a wealth of topics including history and uses origin and production composition and properties recovery storage and transportation properties and analysis of gas stream and gas condensate The text is designed to help with the identification of quality criteria appropriate analysis and testing that fall under the umbrella of ASTM International ASTM is an organization that is recognized globally across borders disciplines and industries and works to improve performance in manufacturing and materials and products This important guide Contains detailed information on natural gas and its constituents Offers an analysis of methane gas hydrates ethane propane butane and gas condensate Includes information on the behavior of natural gas to aid in the planning for recovery storage transportation and use Covers the test methods that are applicable to natural gas and its constituents Written in accessible and easy to understand terms Written for scientists engineers analytical chemists who work with natural gas as well as other scientists and engineers in the industry Handbook of Natural Gas Analysis offers a guide to the analysis standard test methods and procedures that aid in the predictability of gas composition 9PPChe2010to2017 Urdu Tube, 9PPChe2010to2017 and behavior during gas cleaning operations and use **Biomass** Processes and Chemicals James G. Speight, 2022-02-13 Biomass Processes and Chemicals is written to assist the reader in understanding the options available for the production of chemicals from biomass Petroleum based and natural gas based chemicals are well established products that have served industry and consumers for more than one hundred years However time is running out and natural gas and petroleum are now being depleted Thus the need for alternative technologies to produce chemicals is necessary Chemicals produced from sources are now coming into place for the establishment of a
