Korydon Smith, Miguel Guitart

Buckminster Fuller Inc Architecture Radio:

Buckminster Fuller Inc Mark Wigley, 2015 This intellectual biography rethinks the legacy of one of the key protagonists of the twentieth century It shows that the obsessive eccentric brilliance of Buckminster Fuller as a unique amalgam of theorist designer and performance artist was devoted completely to the architecture of radio The book draws extensively on Fuller's archive to follow his thinking from toilets to telepathy plastics to prosthetics nanostructures to networks and deep data to deep space It shows that the critical arguments and material techniques of arguably the single most exposed designer of the last century were too radical to be grasped at the time but have become urgently relevant today Fuller becomes a crucial reference point in trying to understand and engage our increasingly electronic world Page 4 de la couverture

Buckminster Fuller's World Game and Its Legacy Timothy Stott, 2021-06-29 This book studies R Buckminster Fuller's World Game and similar world games past and present Proposed by Fuller in 1964 and first played in colleges and universities across North America at a time of growing ecological crisis the World Game attempted to turn data analysis systems modelling scenario building computer technology and information design to more egalitarian ends to meet human needs It challenged players to redistribute finite planetary resources more equitably to make the world work Criticised and lauded in equal measure the World Game has evolved through several formats and continues today in correspondence with debates on planetary stewardship gamification data management and the democratic deficit This book looks again at how the World Game has been played focusing on its architecture design and gameplay With hindsight the World Game might appear naïve utopian or technocratic but we share its problems if not necessarily its solutions Such a study will be of interest to scholars working in art history design history game studies media studies architecture and the environmental humanities

Radical Pedagogies Beatriz Colomina, Ignacio G. Galán, Evangelos Kotsioris, Anna-Maria

Meister,2022-05-31 Experiments in architectural education in the post World War II era that challenged and transformed architectural discourse and practice In the decades after World War II new forms of learning transformed architectural education These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms decentered building imagined new roles for the architect and envisioned participatory forms of practice Although many of the experimental programs were subsequently abandoned terminated or assimilated they nevertheless helped shape and in some sense define architectural discourse and practice This book explores and documents these radical pedagogies and efforts to defy architecture's status quo The experiments include the adaptation of Bauhaus pedagogy as a means of unlearning under the conditions of decolonization in Africa a movement to design for every body including the disabled by architecture students and faculty at the University of California Berkeley the founding of a support network for women interested in the built environment regardless of their academic backgrounds and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design Viewed through their dissolution and afterlife as well as through their founding stories these projects from the last century raise provocative questions about architecture's role in the new century **Reality Modeled After Images**

Michael Young,2021-08-30 Reality Modeled After Images Architecture and Aesthetics after the Digital Image explores architecture's entanglement with contemporary image culture It looks closely at how changes produced through technologies of mediation alter disciplinary concepts and produce political effects Through both historical and contemporary examples it focuses on how conventions of representation are established maintained challenged and transformed Critical investigations are conjoined with inquiries into aesthetics and technology in the hope that the tensions between them can aid an exploration into how architectural images are produced disseminated and valued how images alter assumptions regarding the appearances of architecture and the environment For students and academics in architecture design and media studies architectural and art history and related fields this book shows how design is impacted and changed by shifts in image culture representational conventions and technologies **Modern Architecture: A Very Short Introduction** Adam

Sharr,2018-11-15 Somewhere between 1910 and 1970 architecture changed Now that modern architecture has become familiar sometimes celebrated sometimes vilified it's hard to imagine how novel it once seemed Expensive buildings were transformed from ornamental fancies which referred to the classical and medieval pasts into strikingly plain reflections of novel materials functions and technologies Modern architecture promised the transformation of cities from overcrowded conurbations characterised by packed slums and dirty industries to spacious realms of generous housing and clean mechanised production set in parkland At certain times and in certain cultures it stood for the liberation of the future from the past This Very Short Introduction explores the technical innovations that opened up the cultural and intellectual opportunities for modern architecture to happen Adam Sharr shows how the invention of steel and reinforced concrete

radically altered possibilities for shaping buildings transforming what architects were able to imagine as did new systems for air conditioning and lighting While architects weren't responsible for these innovations they were among the first to appreciate how they could make the world look and feel different in connection with imagery from other spheres like modern art and industrial design Focusing on a selection of modern buildings that also symbolize bigger cultural ideas Sharr discusses what modern architecture was like why it was like that and how it was imagined Considering the work of some of the historians and critics who helped to shape modern architecture he demonstrates how the field owes as much to its storytellers as to its buildings ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Solar Adobe Albert Narath, 2024-03-05 How a centuries old architectural tradition reemerged as a potential solution to the political and environmental crises of the 1970s Against the backdrop of a global energy crisis a widespread movement embracing the use of raw earth materials for building construction emerged in the 1970s Solar Adobe examines this new wave of architectural experimentation taking place in the United States detailing how an ancient tradition became a point of convergence for issues of environmentalism architecture technology and Indigenous resistance Utilized for centuries by the Pueblo people of the American Southwest and by Spanish colonialists adobe construction found renewed interest as various groups contended with the troubled legacies of modern architecture and an increasingly urgent need for sustainable design practices In this period of critical experimentation design networks that included architects historians counterculture communities government weapons labs and Indigenous activists all looked to adobe as a means to address pressing environmental and political issues Albert Narath charts the unique capacities of adobe construction across a wide range of contexts consistently troubling simple distinctions between traditional and modern technologies high design and vernacular architecture Drawing insightful parallels between architecture environmentalism and movements for Indigenous sovereignty Solar Adobe stresses the importance of considering the history of the built environment in conjunction with architecture's larger impact on the natural world

Questioning Technology with Jacques Ellul David W. Gill, Lisa Richmond, 2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology's promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary Questioning Technology with Jacques Ellul addresses these questions in both the big picture

and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society **Modern Architecture** Adam Sharr,2018 Adam Sharr tells the story of how modern architecture developed and produced its powerful cultural images Considering the new building materials and techniques which shaped the movement such as innovations in steel and concrete and the advent of air conditioning he concludes by asking whether contemporary architecture remains modern at heart **Code and Clay, Data and Dirt** Shannon Mattern,2017-11-01 For years pundits have trumpeted the earthshattering changes that big data and smart networks will soon bring to our cities But what if cities have long been built for intelligence maybe for millennia In Code and Clay Data and Dirt Shannon Mattern advances the provocative argument that our urban spaces have been smart and mediated for thousands of years Offering powerful new ways of thinking about our cities Code and Clay Data and Dirt goes far beyond the standard historical concepts of origins development revolutions and the accomplishments of an elite few Mattern shows that in their architecture laws street layouts and civic knowledge and through technologies including the telephone telegraph radio printing writing and even the human voice cities have long negotiated a rich exchange between analog and digital code and clay data and dirt ether and ore Mattern s vivid prose takes readers through a historically and geographically broad range of stories scenes and locations synthesizing a new narrative for our urban spaces Taking media archaeology to the city s streets Code and Clay Data and Dirt reveals new ways to write our urban media and cultural histories
