This deft and lively study by Robert DeCaroli explores the questions of how and why the earliest verifiable images of the historical Buddha were created. In so doing, DeCaroli steps away from old questions of where and when to present the history of Buddhism's relationship with figural art as an ongoing set of negotiations within the Buddhist community and in society at large. By comparing innovations in Brahmanical, Jain, and royal artistic practice, DeCaroli examines why no image of the Buddha was made until approximately five hundred years after his death and what changed in the centuries surrounding the start of the Common Era to suddenly make those images desirable and acceptable. The textual and archaeological sources reveal that figural likenesses held special importance in South Asia and were seen as having a significant amount of agency and power. Anxiety over image use extended well beyond the Buddhists, helping to explain why images of Vedic gods, Jain teachers, and political elites also are absent from the material record of the centuries BCE. DeCaroli shows how the emergence of powerful dynasties and rulers who benefited from novel modes of visual authority was at the root of the changes in attitude toward figural images. However, as DeCaroli demonstrates, a strain of unease with figural art persisted even after a tradition of images of the Buddha had become established.

The Buddha in Lanna Angela S. Chiu, 2017-03-31

For centuries wherever Thai Buddhists have made their homes, statues of the Buddha have provided striking testament to the role of Buddhism in the lives of the people. The Buddha in Lanna offers the first in-depth historical study of the Thai tradition of donation of Buddha statues. Drawing on palm leaf manuscripts and inscriptions many never previously translated into English, the book reveals the key roles that Thai Buddha images have played in the social and economic worlds of their makers and devotees from the fifteenth to twentieth centuries. Author Angela Chiu introduces stories from chronicles, histories, and legends written by monks in Lanna, a region centered in today's northern Thailand. By examining the stories, themes, structures, and motifs, she illuminates the complex conceptual and material aspects of Buddha images that influenced their functions in Lanna society. Buddha images were depicted as social agents and mediators, the focal points of pan-regional political, religious lineages, and rivalries, indeed as the very generators of history itself. In the chronicles, Buddha images also unified the Buddha with the northern Thai landscape, thereby integrating Buddhist and local conceptions of place. By comparing Thai Buddha statues with other representations of the Buddha, the author underscores the contribution of the Thai evidence to a broader understanding of how different types of Buddha representations were understood to mediate the presence of the Buddha. The Buddha in Lanna focuses on the Thai Buddha image as a part of the wider society and history of its creators and worshippers beyond monastery walls, shedding much needed light on the Buddha image in history. With its impressive range of primary sources, this book will appeal to students and scholars of Buddhism and Buddhist art history, Thai studies, and Southeast Asian religious studies.
