vision Far from railing against a future in which machines rule the world Moravec embraces it taking the startling view that intelligent robots will actually be our evolutionary heirs Intelligent machines which will grow from us learn our skills and share our goals and values can be viewed as children of our minds And since they are our children we will want them to outdistance us In fact in a bid for immortality many of our descendants will choose to transform into ex humans as they upload themselves into advanced computers This provocative new book the highly anticipated follow up to his bestselling volume Mind Children charts the trajectory of robotics in breathtaking detail A must read for artificial intelligence technology and computer enthusiasts Moravec s freewheeling but informed speculations present a future far different than we ever dared imagine
