Construction Innovation and Process Improvement Akintola Akintoye, Jack Goulding, Girma Zawdie, 2012-04-30 Innovation in construction is essential for growth The industry strives to remain competitive using a variety of approaches and needs to engage structured initiatives linked to proven innovation concepts techniques and applications Even in mature markets like the Architecture Engineering and Construction AEC sector where business behaviour is generally considered as

being risk averse it is increasingly important to embed innovation into mainstream business practices In Construction Innovation and Process Improvement a number of wide ranging issues from construction practice in different countries with different contexts are presented to provide a rich collection of literature embracing theory and practice Chapters are divided into three broad themes of construction innovation relating to Theory and Practice Process Drivers and Future Technologies Several questions are posed including for example What is particularly unique about construction innovation in theory and practice What are the major drivers of construction innovation What factors are needed to support and deliver future construction technologies In attempting to respond to such questions the book sheds new light on these challenges and provides readers with a number of ways forward especially cognisant of the increased role of globalisation the enhanced impact of knowledge and importance of innovation All these can have a significant impact on strategic decision making competitive advantage and sustainable policies and practices Part One deals with change management technology sustainable construction and supply chain management Part Two addresses innovation and process improvement drivers including strategic management concurrent engineering risk management innovative procurement knowledge management Part Three explores future technologies in construction and particularly how these can be harnessed and leveraged to help procure innovation and process improvement

Clients Driving Innovation Peter S. Brandon, Shu-Ling Lu, 2009-01-26 In recent years the construction industry has been criticised for lack of successful innovation compared to other major industries The question of why the industry has not been seen to be innovative has created concern among many involved with construction and property The driving concern is where the motivation for this innovation should come from Although construction clients have made an impact in this area the industry itself seems divided as to whether when and where clients should drive the innovation process Clients Driving Innovation brings together an international group of researchers and practitioners to investigate the role of clients in construction innovation Written in three parts it covers the context for innovation driven by clients the client impact on the innovation process and how new ideas can be pushed through into practice Numerous case studies illustrate the role clients can play and the key issues that need to be addressed With increasing interest in the contribution clients can make to construction innovation Clients Driving Innovation will be essential reading for construction management researchers major construction contractors and clients and government policy makers
