between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice This book seeks to offer comprehensive data which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines Mind the Gap has a twofold aim The first is to highlight and characterize the gap between evaluation practices and debates and the substantive knowledge debates within the social and behavioral sciences The second is to show why this gap is problematic for the practice of evaluation while at the same time illustrating possible ways to build bridges The book is centered on the value of producing useful evaluations grounded in social science theory and research
