Building New Worlds 1946 1959 The Carnell Era Volume One:

Building New Worlds, 1946-1959 John Boston, Damien Broderick, 2013-02-13 *Building New Worlds* is a history of a pivotal decades long episode in the birth and growth of today's science fiction. Enthralling and amusing it's written with affection and wit. This is no dry modishly theorized academic analysis. Nor is it a rah rah celebration of the Good Old Days. Here is a candid and astute reader's response to a magazine that by today's standards was often comically bad but was also immensely important in its time and improved like the Little Engine or maybe Starship That Could. *New Worlds* is best remembered today as the fountainhead of the New Wave of audacious experimental SF in the second half of the 1960s under editor Michael Moorcock. But these first pioneering issues from 1946-59 were edited by the magazine's founder John Ted Carnell 1912-72. Carnell was a pillar of the old style UK SF establishment but gamely supportive of innovators most famously of the brilliant J.G. Ballard, Brian W. Aldiss and John Brunner whose early work he nurtured. The story of how *New Worlds* got started, survived and got better is essential to the history of the genres of the fantastic in the UK and indeed the world. And huge fun to read. Watch for the companion volumes *New Worlds Before the New Wave* and *Strange Highways* dealing with *New Worlds*'s companion magazine *Science Fantasy*. [The Cambridge History of Science Fiction](#) Gerry Canavan, Eric Carl Link, 2019-01-03 The first science fiction course in the American academy was held in the early 1950s. In the sixty years since science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. *The Cambridge History of Science Fiction* is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history including not only short stories and novels but also film, art, architecture, music, comics and interactive media. [The Cambridge Companion to the English Short Story](#) Ann-Marie Einhaus, 2016-06-06 This Companion provides an accessible overview of short fiction by writers from England, Scotland, Ireland, Wales and other international sites. A collection of international experts examine the development of the short story in a variety of contexts from the early nineteenth century to the present. They consider how dramatic changes in the publishing landscape during this period such as the rise of the fiction magazine and the emergence of new opportunities in online and electronic publishing influenced the form covering subgenres from detective fiction to flash fiction. Drawing on a wealth of critical scholarship to place the short story in the English literary tradition, this volume will be an invaluable guide for students of the short story in English. **Weird Tales #325** Darrell Schweitzer, Thomas Ligotti, Tanith Lee, 2020-02-20 *Weird Tales* 325 Fall 2001 features *From Out of the Crocodile's Mouth* by Darrell Schweitzer, *The Gravedigger's Apprentice* by Alvin Helms, *Our Temporary Supervisor* by Thomas
