Russian Energy Policy and Military Power Pavel K. Baev, 2012-12-06 This book examines the interplay between energy policy and security policy under Vladimir Putin and his drive to re establish Russia s greatness Assessing the internal contradictions of this policy the book argues that Russia s desire to strengthen its role of energy security provider is undermined by its inability to secure growth in production of oil and gas Further the pressing demand to channel more resources into the military industrial complex clashes with the growing need to invest in the energy complex and the priority

granted to strategic forces deprives the conventional forces of strike power and strategic mobility In conclusion the author anticipates how these contradictions could be resolved and suggests three short scenarios for Russia s continuing transition in the next decade This book will be of interest to students of Russian politics European politics and international security
