Alexis Carrel:

Man's Higher Consciousness Hilton Hotema, 1997-03 **Quality and Quantity** William H. Schneider, 2002-08-08 This book first published in 2001 is an account of eugenicists efforts to improve the inherited biological quality of the French population Popular Eugenics Susan Currell, Christina Cogdell, 2006 In a series of revealing essays Popular Eugenics demonstrates that eugenic thought persisted in science and culture as well as in social policy and goes a long way toward explaining the durability of eugenic thinking and its effects on social policy in the United States The Educated Eye Nancy A. Anderson, 2012 The creation and processing of visual representations in the life sciences is a critical but often overlooked aspect of scientific pedagogy The Educated Eye follows the nineteenth century embrace of the visible in new spectatoria or demonstration halls through the twentieth century cinematic explorations of microscopic realms and simulations of surgery in virtual reality With essays on Doc Edgerton's stroboscopic techniques that froze time and Eames's visualization of scale in Powers of Ten among others contributors ask how we are taught to see the unseen **Healing Fire of Christ** Paul Glynn, 2010-05-17 What are miracles Why do miracles happen Do miracles still happen The subject of miraculous activity is one that has compelled believers for millennia This book describes and recounts some of the most fascinating stories that have taken place not on the dusty pages of some centuries old manuscript but here and now in our own modern world Fr Paul Glynn a Marist priest takes the reader on a trip around the world to the sites of miraculous happenings including healings apparitions and conversions including Lourdes Knock and Fatima Through personal accounts and meticulous studies he is able to show solid evidence and proof of God's work in our lives These inspiring stories will enhance the reader's faith as well as provide a bastion of comfort for those in doubt Illustrated with many photos *Alexis Carrel, 1873-1944, Etc. [With Plates, Including Portraits, and a Bibliography].* Robert SOUPAULT, Alexis Carrel, 1952 *Dr. John Harvey Kellogg and the Religion of Biologic Living* Brian C. Wilson, 2014-09-18 A biography of the physician and health guru examining his views on science and medicine as he evolved religiously Purveyors of spiritualized medicine have been legion in American religious history but few have achieved the superstar status of Dr John Harvey Kellogg and his Battle Creek Sanitarium In its heyday the San was a combination spa and Mayo Clinic Founded in 1866 under the auspices of the Seventh day Adventist Church and presided over by the charismatic Dr Kellogg it catered to many well heeled health seekers including Henry Ford John D Rockefeller and Presidents Taft and Harding It also supported a hospital research facilities a medical school a nursing school several health food companies and a publishing house dedicated to producing materials on health and wellness Rather than focusing on Kellogg as the eccentric creator of corn flakes or a megalomaniacal quack Brian C Wilson takes his role as a physician and a theological innovator seriously and places his religion of Biologic Living in an on going tradition of sacred health and wellness With the fascinating and unlikely story of the San as a backdrop Wilson traces the development of this theology of physiology from its roots in antebellum health reform and Seventh day Adventism to its ultimate accommodation

of genetics and eugenics in the Progressive Era A well researched biography that seeks to restore the reputation of the doctor satirized in T C Boyle s novel The Road to Wellville and in the film of the same name Wilson has done much more than provide a sympathetic biography of the man who headed the once famous Battle Creek Sanitarium There s much here to interest both adherents to and skeptics of today s alternative and holistic medicines as well as fans of American history especially the history of religions Kirkus Reviews While he may look like a certain Kentucky Fried Colonel Kellogg was an early advocate of a vegan diet and the intriguing figure behind the famous Battle Creek Sanitarium that paved the way for many contemporary ideas of holistic health and wellness Wilson s lively and accessible writing introduces readers to spiritualism millennialism the temperance and social purity movements Swedenborgians and Mormons A thought provoking portrait of a charismatic intelligent medical doctor who never stopped absorbing new information and honing his theories even when he was faced with disfellowship from his church and ostracism by friends and colleagues ForeWord Reviews Wilson does an admirable job of portraying how the doctor s beliefs shifted and adapted over time Readers with a keen interest in religious history particularly as it relates to health care will enjoy this biography the most Library Journal

Culturing Life Hannah Landecker,2010-03-30 How did cells make the journey one we take so much for granted from their origin in living bodies to something that can be

grown and manipulated on artificial media in the laboratory a substantial biomass living outside a human body plant or animal This is the question at the heart of Hannah Landecker's book She shows how cell culture changed the way we think about such central questions of the human condition as individuality hybridity and even immortality and asks what it means that we can remove cells from the spatial and temporal constraints of the body and harness them to human intention Rather than focus on single discrete biotechnologies and their stories embryonic stem cells transgenic animals Landecker documents and explores the wider genre of technique behind artificial forms of cellular life She traces the lab culture common to all those stories asking where it came from and what it means to our understanding of life technology and the increasingly blurry boundary between them The technical culture of cells has transformed the meaning of the term biological as life becomes disembodied distributed widely in space and time Once we have a more specific grasp on how altering biology changes what it is to be biological Landecker argues we may be more prepared to answer the social questions that biotechnology is raising
