National Science Foundation (U.S.),1978 **Topics and Trends in Current Statistics Education Research** Gail Burrill,Dani Ben-Zvi,2018-12-29 This book focuses on international research in statistics education providing a solid understanding of the challenges in learning statistics It presents the teaching and learning of statistics in various contexts including designed settings for young children students in formal schooling tertiary level students and teacher professional development The book describes research on what to teach and platforms for delivering content curriculum strategies on how to teach for deep understanding and includes several chapters on developing conceptual understanding pedagogy and technology teacher knowledge and beliefs and the challenges teachers and students face when they solve statistical problems reasoning and thinking This new research in the field offers critical insights for college instructors classroom teachers curriculum designers researchers in mathematics and statistics education as well as policy makers and newcomers to the field of statistics education Statistics has become one of the key areas of study in the modern world of information and big data The dramatic increase in demand for learning statistics in all disciplines is accompanied by tremendous growth in research in statistics education Increasingly countries are teaching more quantitative reasoning and statistics at lower and lower grade levels within mathematics science and across many content areas Research has revealed the many challenges in helping learners develop statistical literacy reasoning and thinking and new curricula and technology tools show promise in facilitating the achievement of these desired outcomes **The Poverty and Education Reader** Paul C. Gorski,Julie Landsman,2023-07-03 Through a rich mix of essays memoirs and poetry the contributors to The Poverty and Education Reader bring to the fore the schooling experiences of poor and working class students highlighting the resiliency creativity and educational aspirations of low income families They showcase proven strategies that imaginative teachers and schools have adopted for closing the opportunity gap demonstrating how they have succeeded by working in partnership with low income families and despite growing class sizes the imposition of rote pedagogical models and teach to the test mandates The contributors teachers students parents educational activists and scholars repudiate the prevalent but too rarely discussed deficit views of students and families in poverty Rather than focusing on how to fix poor and working class youth they challenge us to acknowledge the ways these youth and their families are disenfranchised by educational policies and practices that deny them the opportunities enjoyed by their wealthier peers Just as importantly they offer effective school and classroom strategies to mitigate the effects of educational inequality on students in poverty Rejecting the simplistic notion that a single program policy or pedagogy can undo social or educational inequalities this Reader inspires and equips educators to challenge the disparities to which underserved communities are subjected It is a positive resource for students of education and for teachers principals social workers community organizers and policy makers who want to make the

promise of educational equality a reality
