development was static for all intents and purposes and that whatever incremental changes took place in it were inconsequential to the development of the British Empire and its offshoots Drawing on a unique combination of evidence from both traditional and unconventional sources Phillip Reid shows how merchants shipwrights and mariners used both proven principles and adaptive innovations in hulls rigs and steering systems to manage high physical and financial risks Listen also to the podcast where the author is interviewed about the book for New Books Network and the podcast with Liz Covart for Ben Franklin s World by [clicking here](#)
