Many scientists think that people traveled from Asia to North America over this land bridge, but some scientists disagree. They think people may have come from Asia in boats. Coming by boat would have made it easier for people to spread throughout North and South America faster.

No matter how they came, people eventually spread east all the way to the Atlantic Ocean. They also spread south to the southern tip of South America.

When a lot of people move from one area to another like this, it is called **migration**. People probably traveled in search of food. Early peoples were **nomads**. Nomads are people who move from place to place, looking for good hunting grounds. Even though these people also ate wild grains and fruits, much of their food came from hunting.

When the first peoples arrived from Asia, they found many animals to hunt. For example, they hunted bison and two animals that looked like elephants—mammoths and mastodons. These people hunted with spears.

Around 15,000 years ago, Earth began to warm. As temperatures rose, glaciers began to melt. The oceans rose, and water covered the Beringia land bridge. This cut Asia off from North America once again. The large animals began to disappear, too. Early Americans had to find other sources of food, which included fish and small animals.

**Settlement**

Around 10,000 years ago, there was a major change in how people got food: farming. People in what is now Mexico began planting a type of corn called **maze**. They also grew pumpkins, beans, and squash. These crops gave them a good supply of food. Because they could grow their own food, they did not have to move around anymore. This meant they could spend more time doing other things. Their quality of life got better.

Americans and Asymmetric Conflict Adam B. Lowther, 2007-07-30 As the War in Iraq continues to rage many in the White House State Department Department of Defense and outside government are left to wonder if it was possible to foresee the difficulty the United States is currently having with Sunni nationalists and Islamic extremists Recent American military experience offers significant insight into this question With the fog of the Cold War finally lifting and clarity returning to the nature of conflict the dominance of asymmetry in the military experience of the United States is all too evident Lebanon 1982 1984 Somalia 1992 1994 and Afghanistan 2001 2004 offer recent and relevant insight into successes and failures of American attempts to

fight adversaries utilizing asymmetric conflict to combat the United States when it intervened in these three states. The results illustrate the difficulty of engaging adversaries unwilling to wage a conventional war and the need for improved strategic and tactical doctrine. It is easy, Lowther writes, for Americans to forget the lessons of past conflicts as the politics of the present dominate. His purpose here is to highlight some of history's recent lessons so that we may move forward with an awareness of what experience offers. **American Spiritual Magazine**, 1876
