Americas Other Audubon:

America's Other Audubon Joy M. Kiser, 2012-05-02 America's Other Audubon chronicles the story of Genevieve Jones her family and the making of an extraordinary nineteenth century book Illustrations of the Nests and Eggs of Birds of Ohio At the age of twenty nine Genevieve Jones an amateur naturalist artist and daughter of a country doctor visited the 1876 Centennial World's Fair in Philadelphia where she saw Audubon's paintings in Birds of America on display His artwork inspired her to undertake the production of a book illustrating the birds nests and eggs that Audubon neglected to include in his work Her parents were reluctant to support the undertaking of such an ambitious and expensive project until Genevieve became despondent over a broken engagement Concerned over her fragile mental state they encouraged her to begin the book as a distraction Her brother collected the nests and eggs her father paid for the publishing costs and Genevieve and her girlhood friend learned lithography and began illustrating the specimens The book was sold by subscription in twenty three parts When part one of Genevieve's work was issued leading ornithologists praised the illustrations and Rutherford B Hayes and Theodore Roosevelt added their names to the subscription list One reviewer wrote It is one of the most beautiful and desirable works that has ever appeared in the United States upon any branch of natural history and ranks with Audubon's celebrated work on birds Then suddenly Genevieve died of typhoid fever after personally completing only five of the illustrations Her family took up the completion of the work in her memory They labored for seven years until the book was completed in 1886 collecting nests and eggs drawing lithographs on stone and hand coloring fifty copies of each illustration and writing the field notes for each species of bird Both the brother who collected the nests and eggs and wrote the field notes and the mother who completed the drawings on stone and hand coloring were stricken with typhoid fever two years after Genevieve's death and nearly died In spite of serious damage to their health they never gave up and labored until the book was finished The father covered the publishing costs which were higher than had been anticipated and were not covered by the subscription price and ultimately lost his entire retirement savings completing the task in his daughter's memory The mother lost her eyesight at the end of her life from the effects of typhoid fever and long hours of straining to draw and color the nests and eggs But neither parent ever complained and considered their work on the book the most important accomplishment of their lives When the mother's copy of the volume was exhibited on the Chicago World's Fair in 1893 it was awarded a bronze medal Only 90 copies of the book were produced and fewer than 20 have been located today in libraries or in private collections America's Other Audubon includes a foreword by the Curator of Natural History Rare Books at the Smithsonian Leslie Overstreet a prologue and introduction by researcher and writer Joy M Kiser with archival photographs of the family and original advertisements and ephemera from the publication and sale of the book the 68 original color plates of nests and eggs plus selected field notes a key to the eggs and a key to the birds scientific and current common names which have changed since the book first published in the nineteenth century Joy Kiser has been friends with

Minchin, 2021-04 In 2018 almost half of all vehicles made in North America were produced at foreign owned plants and the sector was on track to monopolize the market Despite this the industry has been overlooked compared with its domestic counterpart both in scholarship and popular memory Redressing this neglect America's Other Automakers provides a new history of the foreign-owned auto sector the first to extensively draw on archival sources and to articulate the human agency of participants including workers managers and industry recruiters Timothy J Minchin challenges the view that the industry's growth primarily reflected incentives stressing human agency and the complexity of individual stories instead Deeply human in its approach the book also explores the industry's impact on grassroots communities showing that it had more costs than supporters acknowledged Drawing on a wide range of primary and secondary sources America's Other Automakers uncovers significant tensions over unionization reports of discriminatory hiring and unease about the industry's rapid growth critically exploring seven large assembly facilities and their impact on the communities in which they were built
