## **Americas War Machine Vested Interests Endless Conflicts:**

**America's War Machine** James McCartney, Molly Sinclair McCartney, 2015-10-27 Award winning Washington reporter James McCartney and his wife and co writer Molly Sinclair McCartney reveal how reckless military spending has made the U S into a perpetual war machine

*America's War Machine* James McCartney, Molly Sinclair McCartney, 2015-10-27 A veteran Washington reporter reveals how years of military slanted domestic and foreign policy have turned the U S into a perpetual war machine When President Dwight D Eisenhower prepared to leave the White House in 1961 he did so with an ominous message for the American people about the disastrous rise of the military industrial complex Fifty years later the complex has morphed into a virtually unstoppable war machine one that dictates U S economic and foreign policy in a direct and substantial way Based on his experiences as an award winning Washington based reporter covering national security James McCartney presents a compelling history from the Cold War to present day that shows that the problem is far worse and far more wide reaching than anything Eisenhower could have imagined Big Military has become too big to fail and has grown to envelope the nation s political cultural and intellectual institutions These centers of power and influence including the now complicit White House and Congress have a vested interest in preparing and waging unnecessary wars The authors persuasively argue that not one foreign intervention in the past 50 years has made us or the world safer With additions by Molly Sinclair McCartney a fellow journalist with 30 years of experience America s War Machine provides the context for today s national security state and explains what can be done about it

**Domestic Causes of American Wars** Ivan Eland, 2025-08-01 Domestic Causes of American Wars offers a unique and critical take on the causes of major American wars throughout its history Unlike most histories that designate foreign threats as casus belli this work examines their important underlying economic triggers reaching the striking conclusion that many were unnecessary for national security nor were they as heroic in upholding American values as commonly concluded Further conventional histories often dwell on the positive outcomes of those wars

rather than on their much more important domestic ill effects the erosion of the American founders constitution and of the civil liberties and constitutional checks and balances therein while enabling the rise of an imperial presidency This historical volume addresses those often buried domestic causes and effects in particular how the American elections cycle often affects U S entry into wars and how economic motives incentivize war America s early wars the 1812 war against Canada the Mexican war the wars against Native Americans all concerned territorial aggrandizement and acquisition of the rich resources therein The industrial north fought the Civil War to prevent the expansion of the South s cheaper mode of production based on slavery into the expansive territories acquired during the Mexican War The Spanish American war marked the U S lift off beyond its new domestic borders in pursuit of domination and exploitation in Latin America and the acquisition of new territories overseas The United States entered World War I to save its trade and loans with Britain and France During World War II a unique permanent U S military industrial complex arose that lobbied for continued weapons production during peacetime to sustain its fragile local economies Thus by exaggerating the Soviet threat pressures arose for military interventions in Korea and then Vietnam during the Cold War The threat of terrorism similarly served to keep the war economy afloat during the post Cold War era by an overly expansive war on terrorism The prospect of accessing Iraq s oil incentivized the war in that country The need for ongoing wars to feed the voracious appetite of the military industrial complex through billions of dollars of arms sales has been an ever present factor in the wars in Afghanistan and Ukraine

*In Search of Monsters to Destroy* Christopher J. Coyne, 2022-12-08 Imperialism and militarism build empires not liberalism So says Christopher Coyne Senior Fellow at the Independent Institute and professor of economics at George Mason University in this eye opening must read book on America s recent foreign policy failures The attempt by the United States since 9 11 to establish liberal political regimes in the Middle East and in the mountains of Afghanistan was doomed to fail And the logic is simple illiberal means can lead only to illiberal ends What else are the hundreds of thousands of dead and mutilated civilians the US military left behind from 2003 to 2021 in these regions The destroyed ancient cultures and nearly obliterated nation states Coyne also points out that the illiberal perpetrators also can end up not only nearly bankrupt and humiliated but also profoundly less secure If we do not absorb these hard truths says Coyne the rest of the twenty first century will be a repeat of its bloodstained unstable beginning But Coyne is no isolationist A vocal champion of global engagement Coyne insists there are workable proven alternatives to imperialism militarism and empire ones deeply rooted in human experience that preserve freedom promote security and foster mutually enriching friendship among the nations of the earth Read *In Search of Monsters to Destroy* and you ll never look at the nation state or international relations the same again *The Cost of Loyalty* Tim Bakken, 2020-02-18 A Kirkus Reviews Best Book of 2020 A courageous and damning look at the destruction wrought by the arrogance incompetence and duplicity prevalent in the U S military from the inside perspective of a West Point professor of law Veneration for the military is a deeply embedded but fatal flaw in America s

collective identity In twenty years at West Point whistleblower Tim Bakken has come to understand how unquestioned faith isolates the U S armed forces from civil society and leads to catastrophe Pervaded by chronic deceit the military's insular culture elevates blind loyalty above all other values The consequences are undeniably grim failure in every war since World War II millions of lives lost around the globe and trillions of dollars wasted Bakken makes the case that the culture he has observed at West Point influences whether America starts wars and how it prosecutes them Despite fabricated admissions data rampant cheating epidemics of sexual assault archaic curriculums and shoddy teaching the military academies produce officers who maintain their privileges at any cost to the nation Any dissenter is crushed Bakken revisits all the major wars the United States has fought from Korea to the current debacles in the Middle East to show how the military culture produces one failure after another The Cost of Loyalty is a powerful multifaceted revelation about the United States and its singular source of pride One of the few federal employees ever to win a whistleblowing case against the U S military Bakken in this brave timely and urgently necessary book and at great personal risk helps us understand why America loses wars

Tyranny Comes Home Christopher J. Coyne, Abigail R. Hall, 2018-04-03 Many Americans believe that foreign military intervention is central to protecting our domestic freedoms But Christopher J Coyne and Abigail R Hall urge engaged citizens to think again Overseas our government takes actions in the name of defense that would not be permissible within national borders Emboldened by the relative weakness of governance abroad the U S government is able to experiment with a broader range of social controls Under certain conditions these policies tactics and technologies are then re imported to America changing the national landscape and increasing the extent to which we live in a police state Coyne and Hall examine this pattern which they dub the boomerang effect considering a variety of rich cases that include the rise of state surveillance the militarization of domestic law enforcement the expanding use of drones and torture in U S prisons Synthesizing research and applying an economic lens they develop a generalizable theory to predict and explain a startling trend Tyranny Comes Home unveils a new aspect of the symbiotic relationship between foreign interventions and domestic politics It gives us alarming insight into incidents like the shooting in Ferguson Missouri and the Snowden case which tell a common story about contemporary foreign policy and its impact on our civil liberties

**Delta of Power** Alex Roland, 2021-08-10 Does the Military Industrial Complex as we understand it still exist If so how has it changed since the end of the Cold War First named by President Dwight D Eisenhower in his farewell address the Military Industrial Complex originally an exclusively American phenomenon of the Cold War was tailored to develop and produce military technologies equal to the existential threat perceived to be posed by the Soviet Union An informal yet robust relationship between the military and industry the MIC pursued and won a qualitative technological arms race but exacted a high price in waste fraud and abuse Today although total US spending on national security exceeds 1 trillion a year it accounts for a smaller percentage of the federal budget the national GDP and world military spending than during the Cold War Given this fact is the MIC as we commonly understand it

still alive If so how has it changed in the intervening years In *Delta of Power* Alex Roland tells the comprehensive history of the MIC from 1961 the Cold War and the War on Terror to the present day Roland argues that the MIC is now significantly different than it was when Eisenhower warned of its dangers still exerting a significant but diminished influence in American life Focusing intently on the three decades since the end of the Cold War in 1991 Roland explains how a lack of cohesion rapid change and historical contingency have transformed America's military industrial institutions and infrastructure Roland addresses five critical realms of transformation civil military relations relations between industry and the state among government agencies between scientific technical communities and the state and between technology and society He also tracks the way in which America's arsenal has evolved since 1991 The MIC still merits Eisenhower's warning of political and moral hazard he concludes but it continues to deliver by a narrower margin the world's most potent arsenal An authoritative account of America's evolving arsenal since World War II *Delta of Power* is a dynamic exploration of military preparedness and current events

Public Choice Theory and the Illusion of Grand Strategy Richard Hanania, 2021-12-28 This book argues that while the US president makes foreign policy decisions based largely on political pressures it is concentrated interests that shape the incentive structures in which he and other top officials operate The author identifies three groups most likely to be influential government contractors the national security bureaucracy and foreign governments This book shows that the public choice perspective is superior to a theory of grand strategy in explaining the most important aspects of American foreign policy including the war on terror policy toward China and the distribution of US forces abroad Arguing that American leaders are selected to respond to public opinion not necessarily according to their ability to formulate and execute long terms plans the author shows how mass attitudes are easily malleable in the domain of foreign affairs due to ignorance with regard to the topic the secrecy that surrounds national security issues the inherent complexity of the issues involved and most importantly clear cases of concentrated interests The book will be of interest to students and scholars of American Studies Foreign Policy Analysis and Global Governance

*Christianity and the Nation-State* Gary Chartier, 2023-07-27 In *Christianity and the Nation State* Gary Chartier provocatively offers readers unexpected critical distance from some familiar ways of understanding justifying and navigating existing political arrangements People in multiple societies are posing important questions about the authority and functions of the contemporary nation state and about potential alternatives to this seemingly inescapable institution Chartier seeks to develop a distinctive theological response to the conditions prompting these questions Affirming liberalism and cosmopolitanism he reflects critically on nationalism localism religious establishment and theological accounts of political authority He highlights links between sin and state power and underscores deficiencies in democratic rhetoric and theory He rejects the idea of a global government advocating a nonterritorial alternative he labels radical consociationalism Moreover he presents concrete suggestions for life under the rule of the state
