Modern Trends In Physics Research - Third International Conference On Modern Trends In Physics Research

(Mtp-08) Lotfia M El-nadi, 2011-06-24 Modern Trends in Physics Research MTPR 08 was the third of the International Conference series held biannually by the Physics Department in Faculty of Science of Cairo University. The objectives of the conference are to develop greater understanding of physics research and its applications to promote new industries to innovate knowledge about recent breakthroughs in physics both the fundamental and technological aspects to implement international cooperation in new trends in physics research and to improve the performance of the physics research facilities in Egypt. This proceeding highlights the latest results in the fields of astrophysics, atomic molecular condensed matter, lasers, nuclear and particle physics. The peer refereed papers collected in this volume were written by international experts in these fields. The keynote lecture Overview on the Era of the Exploration of the Planets and Planetary Systems delivered by Professor Jay M Pasachoff of Williams College Hopkins Observatory was featured in the proceedings. As 2008 was the 50th anniversary of the launch of Sputnik which began the Space Age, this volume is a unique collection of keynote, plenary and invited presentations covering fields of astrophysics, atomic physics, condensed matter physics, as well as nanotechnology, molecular physics and laser physics. This volume will serve as a useful reference for scientists in modern physics and technology of the 21st century.

Recruiting, Preparing, and Retaining STEM Teachers for a Global Generation, 2019-05-27 There is a critical need to prepare diverse teachers with expertise in science, technology, engineering and mathematics (STEM) with the skills necessary to work effectively with underrepresented K-12 students. Three major goals of funded STEM programs are to attract and prepare students at all educational levels to pursue coursework in the STEM content areas; to prepare graduates to pursue careers in STEM fields; and to improve teacher education programs in the STEM content areas. Drawing upon these goals as the framework for Recruiting, Preparing and Retaining STEM Teachers for a Global Generation, the 15 chapters contained herein highlight both the challenges and successes of recruiting, preparing and sustaining novice teachers in the STEM content areas in high-need schools. Recruiting, retaining and sustaining highly qualified teachers with expertise in STEM content areas to work in hard-to-staff schools and geographic areas are necessary to equalize educational opportunities for rural and urban Title I students. High teacher turnover rates in combination with teachers working out of field leave many students without highly qualified teachers in STEM fields. Most of the chapters in this volume were prepared by scholars who received NSF funding through Noyce and are engaged in addressing research questions related to these endeavours.
