Atomic Comics Cartoonists Confront The Nuclear World:

Atomic Comics Ferenc Morton Szasz, 2013-09-15 The advent of the Atomic Age challenged purveyors of popular culture to explain to the general public the complex scientific and social issues of atomic power Atomic Comics examines how comic books comic strips and other cartoon media represented the Atomic Age from the early 1920s to the present Through the exploits of superhero figures such as Atomic Man and Spiderman as well as an array of nuclear adversaries and atomic themed adventures the public acquired a new scientific vocabulary and discovered the major controversies surrounding nuclear science Ferenc Morton Szasz's thoughtful analysis of the themes content and imagery of scores of comics that appeared largely in the United States and Japan offers a fascinating perspective on the way popular culture shaped American comprehension of the fissioned atom for more than three generations Atomic Comics Ferenc Morton Szasz, 2012-06-01

The advent of the Atomic Age challenged purveyors of popular culture to explain to the general public the complex scientific and social issues of atomic power Atomic Comics examines how comic books comic strips and other cartoon media represented the Atomic Age from the early 1920s to the present Through the exploits of superhero figures such as Atomic Man and Spiderman as well as an array of nuclear adversaries and atomic themed adventures the public acquired a new scientific vocabulary and discovered the major controversies surrounding nuclear science Ferenc Morton Szasz's thoughtful analysis of the themes content and imagery of scores of comics that appeared largely in the United States and Japan offers a fascinating perspective on the way popular culture shaped American comprehension of the fissioned atom for more than three generations *Art and Activism in the Nuclear Age* Roman Rosenbaum, Yasuko Claremont, 2023-05-12 This book

explores the contemporary legacy of Hiroshima and Nagasaki following the passage of three quarters of a century and the role of art and activism in maintaining a critical perspective on the dangers of the nuclear age It closely interrogates the political and cultural shifts that have accompanied the transition to a nuclearised world Beginning with the contemporary socio political and cultural interpretations of the impact and legacy of the destruction of Hiroshima and Nagasaki the chapters examine the challenges posed by committed opponents in the cultural and activist fields to the ongoing development of nuclear weapons and the expanding industrial uses of nuclear power It explores how the aphorism that all art is political is borne out in the close relation between art and activism This multi disciplinary approach to the socio political and cultural exploration of nuclear energy in relation to Hiroshima Nagasaki via the arts will be of interest to students and scholars of peace and conflict studies social political and cultural studies fine arts and art and aesthetic studies *Korean War Comic Books* Leonard Rivas, 2021-04-30

Comic books have presented fictional and fact based stories of the Korean War as it was being fought and afterward Comparing these comics with events that inspired them offers a deeper understanding of the comics industry America's forgotten war and the anti comics movement championed by psychiatrist Fredric Wertham who criticized their brutalization of the imagination Comics both newsstand offerings and government propaganda used

fiction to justify the unpopular war as necessary and moral This book examines the dramatization of events and issues including the war's origins germ warfare brainwashing Cold War espionage the nuclear threat African Americans in the military mistreatment of POWs and atrocities

Militarization and the American Century David Fitzgerald, 2022-01-13 Taking American mobilization in WWII as its departure point this book offers a concise but comprehensive introduction to the history of militarization in the United States since 1940 Exploring the ways in which war and the preparation for war have shaped and affected the United States during The American Century Fitzgerald demonstrates how militarization has moulded relations between the US and the rest of the world Providing a timely synthesis of key scholarship in a rapidly developing field this book shows how national security concerns have affected issues as diverse as the development of the welfare state infrastructure spending gender relations and notions of citizenship It also examines the way in which war is treated in the American imagination how it has been depicted throughout this era why its consequences have been made largely invisible and how Americans have often considered themselves to be reluctant warriors In integrating domestic histories with international and transnational topics such as the American empire of bases and the experience of American service personnel overseas the author outlines the ways in which American militarization had and still has global consequences Of interest to scholars researchers and students of military history war studies US foreign relations and policy this book addresses a burgeoning and dynamic field from which parallels and comparisons can be drawn for the modern day

Atomic Anxiety Frank Sauer, 2015-10-29 With the concept of Atomic Anxiety this book offers a novel perspective on one of the most important and longstanding puzzles of international politics the non use of U S nuclear weapons By focusing on the fear surrounding nuclear weapons it explains why nuclear deterrence and the nuclear taboo are working at cross purposes in practice

Utopianism in the Middle East and North Africa Thomas Pierret, Simon Wolfgang Fuchs, 2025-03-31 This is the first systematic exploration of the diversity of utopian thought and practice in the modern Middle East and North Africa Beyond intellectual debates utopianism has infused the many ideologies that have shaped contentious politics and governance in the region from state formation to revolutionary transformations conflicts and the recent authoritarian resurgence Drawing on case studies from Egypt Turkey Iran Syria Tunisia and Saudi Arabia contributors address a broad array of utopian visions pertaining to political ideologies such as liberalism secularism Islamic revivalism and socialism but also to fields of expertise and technologies such as urbanism the atom and artificial intelligence Likewise they acknowledge the diversity of players that partake in the production of utopias including writers ideologues activists statesmen experts artists and social media users Moreover authors consider both imaginaries promoted by challengers to the incumbents and visions that serve the consolidation of authoritarianism

Nuclear New Mexico M. Jimmie Killingsworth, Jacqueline S. Palmer, 2018-10-04 The mountains valleys forests and sands of 1940s New Mexico served as a picturesque backdrop to the dawn of the Atomic Age the land's natural beauty coexisting with secretive nuclear development Today nuclear tourists and

nature tourists travel a shared path through the state as the history of the bomb is commemorated at official sites often alongside monuments to natural preservation Trinity Site bordered by the Bosque del Apache National Wildlife Preserve Los Alamos wedged between Valles Caldera and Bandelier National Monument and the Waste Isolation Pilot Plant across from Carlsbad Caverns More than just a glimpse into the history of the atomic bomb and the tourism it spawned within New Mexico Nuclear New Mexico also examines the impact of nuclear testing within the rise of environmentalism As readers explore New Mexico's landscape and its history they will recognize familiar uncertainties and concerns about their own special places on the planet as societies adapt to rapidly altered landscapes

Discordant Memories Alison Fields, 2020-02-06 On two separate days in August 1945 the United States dropped atomic bombs over the Japanese cities of Hiroshima and Nagasaki As the seventy fifth anniversary of these cataclysmic bombings draws near American and Japanese citizens are seeking new ways to memorialize these events for future generations In *Discordant Memories* Alison Fields explores through the lenses of multiple disciplines ongoing memories of the two bombings Enhanced by striking color and black and white images this book is an innovative contribution to the evolving fields of memory studies and nuclear humanities To reveal the layered complexities of nuclear remembrance Fields analyzes photography film and artworks offers close readings of media and testimonial accounts traces site visits to atomic museums in New Mexico and Japan and features artists who give visual form to evolving memories According to Fields such expressions of memory both inspire group healing and expose struggles with past trauma Visual forms of remembrance such as science museums peace memorials photographs and even scars on human bodies serve to contain or manage painful memories And yet the author claims distinct cultures lay claim to vastly different remembrances of nuclear history Fields analyzes a range of case studies to uncover these discordant memories and to trace the legacies of nuclear weapons production and testing Her subjects include the Bradbury Science Museum in Los Alamos New Mexico the Hiroshima Peace Memorial Museum in Japan the atomic photography of Carole Gallagher and Patrick Nagatani and artworks and experimental films by Will Wilson and Nanobah Becker In the end Fields argues the trauma caused by nuclear weapons can never be fully contained For this reason commemorations of their effects are often incomplete and insufficient Differences between individual memories and public accounts are also important to recognize *Discordant Memories* illuminates such disparate memories in all their rich complexity

British Art in the Nuclear Age Catherine Jolivet, 2017-07-05 Rooted in the study of objects *British Art in the Nuclear Age* addresses the role of art and visual culture in discourses surrounding nuclear science and technology atomic power and nuclear warfare in Cold War Britain Examining both the fears and hopes for the future that attended the advances of the nuclear age nine original essays explore the contributions of British born and artists in the areas of sculpture textile and applied design painting drawing photo journalism and exhibition display Artists discussed include Francis Bacon John Bratby Lynn Chadwick Prunella Clough Naum Gabo Barbara Hepworth Peter Lanyon Henry Moore Eduardo Paolozzi Peter Laszlo Peri Isabel Rawsthorne

Alan Reynolds Colin Self Graham Sutherland Feliks Topolski and John Tunnard Also under discussion is new archival material from Picture Post magazine and the Festival of Britain Far from insular in its concerns this volume draws upon cross cultural dialogues between British and European artists and the relationship between Britain and America to engage with an interdisciplinary art history that will also prove useful to students and researchers in a variety of fields including modern European history political science the history of design anthropology and media studies
