Aldo Leopold A Fierce Green Fire:

Aldo Leopold Marybeth Lorbiecki, 1996 Biography of one of this century's most influential conservationists *A Fierce Green Fire* Marybeth Lorbiecki, 2016 The first edition of Lorbiecki's biography on Aldo Leopold has remained the only biography for the general public on Leopold short readable with historic photographs and context on the whole history of American conservation This new edition offers the same thorough dedication to subject as well as a commentary on twenty first century conservation efforts **Aldo Leopold** Marybeth Lorbiecki, 1999-01-01 Written in a clear accessible style this biography reveals the background early inspiration and triumphs of Aldo Leopold and traces the foremost environmentalist's development as a leader in the conservationist movement 160 linecuts **A Fierce Green Fire** Philip Shabecoff, 2012-09-26 In *A Fierce Green Fire* renowned environmental journalist Philip Shabecoff presents the definitive history of American environmentalism from the earliest days of the republic to the present He offers a sweeping overview of the contemporary environmental movement and the political economic social and ethical forces that have shaped it More importantly he considers what today's environmental movement needs to do if it is to fight off the powerful forces that oppose it and succeed in its mission of protecting the American people their habitat and their future Shabecoff traces the ecological transformation of North America as a result of the mass migration of Europeans to the New World showing how the environmental impulse slowly formed among a growing number of Americans until by the last third of the 20th Century environmentalism emerged as a major social and cultural movement The efforts of key environmental figures among them Henry David Thoreau George Perkins Marsh Theodore Roosevelt Gifford Pinchot John Muir Aldo Leopold David Brower Barry Commoner and Rachel Carson are examined So too are the activities of non governmental environmental groups as well as government agencies such as the EPA and Interior Department along with grassroots efforts of Americans in communities across the country The author also describes the economic and ideological forces aligned against environmentalism and their increasing successes in recent decades Originally published in 1993 this new edition brings the story up to date with an analysis of how the administration of George W Bush is seeking to dismantle a half century of progress in protecting the land and its people and a consideration of the growing international effort to protect Earth's life support systems and the obstacles that the United States government is placing before that effort In a forward looking final chapter Shabecoff casts a cold eye on just what the environmental movement must do to address the challenges it faces Now at this time when environmental law institutions and values are under increased attack and opponents of environmentalism are enjoying overwhelming political and economic power *A Fierce Green Fire* is a vital reminder of how far we have come in protecting our environment and how much we have to lose *Aldo Leopold* Curt D. Meine, 2010-10-19 This biography of Aldo Leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the United States This edition includes a new preface by author Curt Meine and an appreciation by acclaimed Kentucky

writer and farmer Wendell Berry *Walden by Haiku* Ian Marshall, 2012-01-01 In this intriguing literary experiment Ian Marshall presents a collection of nearly three hundred haiku that he extracted from Henry David Thoreau's *Walden* and documents the underlying similarities between Thoreau's prose and the art of haiku. Although Thoreau would never have encountered the Japanese haiku tradition, the way in which the most important ideas in *Walden* find expression in the most haikulike language suggests that Thoreau at Walden Pond and the haiku master Basho at his old pond might have drunk at the same well. *Walden* and the tradition of haiku share an aesthetic that embodies ideas in natural images, dissolves boundaries between self and world, emphasizes simplicity, and honors both solitude and humble familiar objects. Marshall examines each of these aesthetic principles and offers a relevant collection of found haiku. In the second part of the book, he explains his process of finding the haiku in the text, breaking down each chapter of *Walden* to highlight the imagery and poetic language embedded in the most powerful passages. Marshall's exploration not only provides a fresh perspective on haiku but also sheds new light on Thoreau's much studied text and lays the foundation for a clearer understanding of the aesthetics of American nature writing.

Wisdom for a Livable Planet Carl N. McDaniel, 2011-04-15 The author profiles the work of eight visionaries who have dedicated their lives to various environmental issues. Each story provides a portrait of an individual's valiant and inspiring campaign to improve the conditions for life on our planet. Taken together, the work of these people points the way toward creating an ecologically centered civilization in which a brighter future for all life, including human, is possible. Terri Swearingen takes on one of the world's largest hazardous waste incinerators burning toxic waste next door to an elementary school. Stephen Schneider establishes the scientific basis for climate change. Herman Daly advocates a dynamic steady state economy that respects the laws of nature and human behavior. David Orr champions educational reform to make universities a place where students learn how to be environmentally aware citizens. Werner Fornos works toward empowering every person with the knowledge and means to decide when and how many children to have. Helena Norberg Hodge champions local living with appropriate technologies to enhance our spiritual and ecological well-being. Wes Jackson promotes sustainable agriculture based on local ecology and community values. Dave Foreman leads the effort to rewild almost half of North America with wolves, mountain lions, jaguars, falcons, and others to restore functional ecosystems and preserve biodiversity.

Learning as a Way of Leading Stephen Preskill, Stephen D. Brookfield, 2008-11-17 This book offers a systematic look at the connections between learning and leading and the use of learning to inspire and organize for change. It explores two interrelated dimensions of learning leadership: the ways leaders themselves learn about leadership practice and the way leaders foster the learning of those they work with. The book focuses on a number of important leadership activities and adopts a case study approach to illuminate how leaders themselves learn how they impart knowledge to others and how they support others in becoming more effective and enduring learners.
