Alexander Pope The Poet And The Landscape:

Alexander Pope Mavis Batey, 1999 This work provides a look at Pope's relationship with the leading garden makers of his time. Forever planning and plotting for his own grotto and for his modest five acres in Twickenham, his ideas were also sought at many of the great estates. His importance to Lord Burlington at Chiswick, Henrietta Howard at Marble Hill, and above all to William Kent, the great designer, is made abundantly clear. The author sets out to throw new light on her subject and show why Pope has been and remains so crucial to our landscape.

The Poetry of Translation Matthew Reynolds, 2011-09-29 A very wide ranging book which launches a new theory of poetry translation and pursues it through readings of poem translations from across the history of English literature. It engages with the key debates in translation studies and offers new interpretations of major works such as Pope's Iliad, Pound's Cathay, and Dryden's Aeneis.

Print, Visuality, and Gender in Eighteenth-century Satire Katherine Mannheimer, 2011 This study interprets eighteenth-century satire's famous typographical obsession as a fraught response to the Enlightenment's ocularcentric epistemological paradigms and to a print cultural moment identified by book historians as increasingly visual. As the first to pay widespread attention to format layout and visual advertising strategies, the Augustans were convinced of the ability of their texts to function as a kind of optical machinery, rivaling that of the New Science, enhancing readers' physical and moral vision while at the same time they feared the dangers of an overly scrutinizing gaze as one that might undermine the viewer's natural faculty for candor, sympathy, delight, and desire. Mannheimer studies this distrust of the empirical gaze and its applications in print to the inherent gender politics and broader ethical concerns of ocularcentrism in the works of Montagu, Swift, Pope, and Fielding. These writers sought to ensure that print itself never became either a mere tool or an inert object for the gaze but rather that it remained a dynamic and interactive medium by which readers could learn both to see and to see themselves seeing.

Plants and Gardens as Artefacts in Transcultural Contexts Minna Törmä, 2025-09-30 This edited volume explores the ways in which the object biography or object itinerary approach could be adapted to frame research on animate objects such as plants and gardens in transcultural contexts. By treating these animate elements as objects in the manner of artefacts and looking at their individual histories, we gain a more nuanced sense of how data accumulated, how new knowledge developed through printed texts and specimen collections, and how the creators of gardens or landscapes formed their collections. Chapters explore the shifts in meanings when objects from diverse origins meet in new cultural contexts where their new owners create assemblages based on their perception of the world. The book will be of interest to scholars working in art history, material culture, and cultural geography.

Place-making for the Imagination: Horace Walpole and Strawberry Hill Marion Harney, 2016-04-08 Drawing together landscape architecture and literature, Strawberry Hill, the celebrated eighteenth-century Gothic villa and garden beside the River Thames, is an autobiographical site where we can read the story of its creator, Horace Walpole. This man of taste created private resonances, pleasure and entertainment, a collusion of the

historic the visual and the sensory Above all it expresses the inseparable integration of house and setting and of the architecture with the collection all specific to one individual a unity that is relevant today to all architects landscape designers and garden and country house enthusiasts Avoiding the straightforward architectural description of previous texts this beautifully illustrated book reveals the Gothic villa and associated landscape to be inspired by theories that stimulate The Pleasures of the Imagination articulated in the series of essays by Joseph Addison 1672 1719 published in the Spectator 1712 Linked to this argument it proposes that the concepts behind the designs for Strawberry Hill are not based around architectural precedent but around eighteenth century aesthetics theories antiquarianism and matters of Taste Using architectural quotations from Gothic tombs Walpole expresses the mythical idea that it was based on monastic foundations with visual links to significant historical figures and events in English history The book explains for the first time the reasons for its creation which have never been adequately explored or fully understood in previous publications The book develops an argument that Walpole was the first to define theories on Gothic architecture in his Anecdotes of Painting 1762 71 Similarly innovative The History of the Modern Taste in Gardening 1780 is one of the first to attempt a history and theory of gardening The research uniquely evaluates how these theories found expression at Strawberry Hill This reassessment of the villa and its associated l

The Cambridge Companion to Alexander Pope Pat Rogers, 2007-12-06 Alexander Pope was the greatest poet of his age and the dominant influence on eighteenth century British poetry His large oeuvre written over a thirty year period encompasses satires odes and political verse and reflects the sexual moral and cultural issues of the world around him often in brilliant lines and phrases which have become part of our language today This is the first overview to analyse the full range of Pope s work and to set it in its historical and cultural context Specially commissioned essays by leading scholars explore all of Pope s major works including the sexual politics of The Rape of the Lock the philosophical enquiries of An Essay on Man and the Moral Essays and the mock heroic of The Dunciad in its various forms This volume will be indispensable not only for students and scholars of Pope s work but also for all those interested in the Augustan age **Literary Milieux**

David Womersley, Richard Anthony McCabe, 2008 The essays range from Shakespeare and early modern literature to Wordsworth They evince scrupulous care over the handling of evidence an interdisciplinary impulse yoked always to a prizing of the literary particularly the poetic a willingness to embrace an ambitious argument where it can be supported a humaneness of temper particularly in polemic Latent within them all is a wrestling with the central problem of text and context **BOOK JACKET**

The Protected Vista Tom Brigden, 2019-05-03 The Protected Vista draws a historical lineage from the eighteenth century picturesque to present day planning policy highlighting how the values embedded within familiar views have developed over time through appropriation by diverse groups for cultural and political purposes The book examines the intellectual construction of the protected vista questioning the values entrenched within the view by whom and how they are observed and disseminated to reveal how these views have been and continue to be part of a changing

historical and political narrative With a deeper knowledge and understanding of the shifting values in urban views we will be better equipped to make decisions surrounding their protection in our urban centres The book identifies the origins of current view protection policy in the aesthetic convention of the picturesque drawing on a range of illustrated examples in the UK the US Australia Canada and South Africa to serve as a useful reference for students researchers and academics in architecture architectural conservation landscape and urban planning **America's Historic Landscapes** Ary J.

Lamme,1989 **Landscapes of Memory and Experience** Jan Birksted,2012-12-06 It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art history and visual studies because of a lack of engagement with the theories methods and concepts of these disciplines This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances since landscape studies would challenge the underlying assumptions of traditional phenomenological theory Thus the history and theory of twentieth century landscape might not only once again share concepts and methods with contemporary art and design history but might in turn influence them A complementary sequel to *Relating Architecture to Landscape* this volume of essays explores further areas of interest and discussion in the landscape architecture debate and offers contributions from a team of well known researchers teachers and writers The choice of topics is wide ranging and features case studies of modern and contemporary schemes from the USA Far East and Australasia
