Algebra 1 An Incremental Development 3rd Edition Saxon Algebra 1:

Algebra 1 John H. Saxon, Jr., Saxon, 1997-06 Saxon math programs produce confident students who are not only able to correctly compute but also to apply concepts to new situations. These materials gently develop concepts and the practice of those concepts is extended over a considerable period of time. This is called incremental development and continual review. Material is introduced in easily understandable pieces, increments, allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Algebra 1 third edition is made up of five instructional components: Introduction of the New Increment, Examples with Complete Solutions, Practice of the Increment, Daily Problem Set, and Cumulative Tests. Algebra 1 covers topics typically treated in a first year algebra course. This set contains a student text, answer key, and test forms. A solutions manual is available separately. The committee that produced this book consisted of mathematicians, mathematics educators, and methodologists who began with the following charge: Evaluate the quality of the evaluations of the thirteen National Science Foundation (NSF) supported and six commercially generated mathematics curriculum materials. Determine whether the available data are sufficient for evaluating the efficacy of these materials and if not, develop recommendations about the design of a project that could result in the generation of more reliable and valid data for evaluating such materials. The committee collected, reviewed, and classified almost 700 studies, solicited expert testimony during two workshops, developed an evaluation framework, established dimensions criteria for three methodologies: content analyses, comparative studies, and case studies, drew conclusions on the corpus of studies, and made recommendations for future research. *Algebra One and One-Half* John H.
