Part of this pattern is an increasing blurring of boundaries between the state and private sector a move from government to new forms of strategic governance and from hierarchy to heterarchy *Challenges for Public Education* examines the educational leadership policy and social justice implications of these trends in Australia and internationally It maps this movement through early shifts to school based management in Australia New Zealand and Sweden and recent moves such as the academies programme in England and charter schools in the United States It draws on recent studies of a distinct new phase in Australian school reform the creation of independent public schools IPS in Western Australia and Queensland and global policy moves in public education in order to provide a truly international dialogue and debate on these matters This book moves beyond critique It innovatively brings together Australian and international perspectives and a rich range of diverse theoretical lenses practice philosophy feminism gender relational and postmodernism As such it provides a crucial forum for illuminating alternate ways to conceptualise educational leadership policy and social justice as resources for hope
