machine used for fun exemplified by Atari and Commodore products and the boring beige adult box used for business exemplified by products from IBM The game machines became fascinating technical and artistic platforms that were of limited real world utility The IBM products were all utility with little emphasis on aesthetics and no emphasis on fun Into this bifurcated computing environment came the Commodore Amiga 1000 This personal computer featured a palette of 4 096 colors unprecedented animation capabilities four channel stereo sound the capacity to run multiple applications simultaneously a graphical user interface and powerful processing potential It was Jimmy Maher writes in *The Future Was Here* the world's first true multimedia personal computer Maher argues that the Amiga's capacity to store and display color photographs manipulate video giving amateurs access to professional tools and use recordings of real world sound were the seeds of the digital media future digital cameras Photoshop MP3 players and even YouTube Flickr and the blogosphere He examines different facets of the platform from Deluxe Paint to AmigaOS to Cinemaware in each chapter creating a portrait of the platform and the communities of practice that surrounded it Of course Maher acknowledges the Amiga was not perfect the DOS component of the operating systems was clunky and ill matched for example and crashes often accompanied multitasking attempts And Commodore went bankrupt in 1994 But for a few years the Amiga's technical qualities were harnessed by engineers programmers artists and others to push back boundaries and transform the culture of computing
