PRINCETON UNIVERSITY PRESS

2014 256 pages 23 x 28cm. 1.58Kgg A\$52

More than half the world's population lives in cities, and that proportion is expected to rise to three-quarters by 2050. Urbanization is a global phenomenon, but the way cities are developing, the experience of city life, and the prospects for the future of cities vary widely from region to region.

The Atlas of Cities presents a unique taxonomy of cities that looks at different aspects of their physical, economic, social, and political structures; their interactions with each other and with their hinterlands; the challenges and opportunities they present; and where cities might be going in the future.

Each chapter explores a particular type of city--from the foundational cities of Greece and Rome and the networked cities of the Hanseatic League, through the nineteenth-century modernization of Paris and the industrialization of Manchester, to the green and "smart" cities of today.

Includes stunning info-graphics, maps, charts, tables, and photos.

Cities Beyond Borders Nicolas Kenny, Rebecca Madgin, 2016-05-23 Drawing on a body of research covering primarily Europe and the Americas but stretching also to Asia and Africa from the mid eighteenth century to the present this book explores the methodological and heuristic implications of studying cities in relation to one another Moving fluidly between comparative and transnational methods as well as across regional and national lines the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life the way cities are occupied and organised on a daily basis but also the urban mindscape the way cities are imagined and represented In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries The Monumental Argyro Loukaki, 2025-03-14 The Monumental is an interdisciplinary collection of original cutting edge contributions by international researchers pursuing the epistemology and ontology of monuments over time and geography The contributors are specialists in geography architectural theory and history prehistoric Greek and Roman archaeology modern art Byzantine studies landscape theory and heritage reception Against the global climate of flux and uncertainty in the present turbulent world the durability of monuments as urban permanences emerges as one of the few remaining spatial and mental anchorages As such it is needed maintained enhanced imitated landscaped and even invented In particular the monumental a spatial and aesthetic phenomenon of perpetual importance has recently acquired major new meanings It now emerges as a key political spatial aesthetic symbolic architectural and archaeological manifestation or entity

open to constantly new even contradictory forms and expressions This collection addresses the urgent need for relevant research on the monumental It breaks new ground by posing fresh questions on the ontology temporality purpose politics scale place contestations and aesthetics of and around the monumental from prehistoric time to the present as well as in both Eastern and Western geographies Monuments are explored as bearers of the urban majestic extraordinary and sublime The Monumental poses questions about changing perceptions the evocative power of representation identity construction ideology and symbolism the vital necessity for a communicative and active public space around monuments imitation processes across geographical space time as well as the powers that construct deconstruct or identify the monumental but also the anti monumental as such Geographies of reference are the European space the United States and Asia Wide ranging theorizations alternate with in depth analyses of paradigmatic cases Conventional as well as alternative forms of the monumental in the present shifting world are also pursued The Monumental is of great value and interest to scholars students and professionals in the fields of architectural theory history and design archaeology art theory and history Byzantine studies restoration urban design and planning human urban and cultural geography cultural studies social anthropology Asian studies as well as those in wider subdisciplines *To Know the World* Mitchell Thomashow, 2020-11-03 Why environmental learning is crucial for understanding the connected challenges of climate justice tribalism inequity democracy and human flourishing How can we respond to the current planetary ecological emergency In *To Know the World* Mitchell Thomashow proposes that we revitalize revisit and reinvigorate how we think about our residency on Earth First we must understand that the major challenges of our time migration race inequity climate justice and democracy connect to the biosphere Traditional environmental education has accomplished much but it has not been able to stem the inexorable decline of global ecosystems Thomashow the former president of a college dedicated to sustainability describes instead environmental learning a term signifying that our relationship to the biosphere must be front and center in all aspects of our daily lives In this illuminating book he provides rationales narratives and approaches for doing just that Mixing memoir theory mindfulness pedagogy and compelling storytelling Thomashow discusses how to navigate the Anthropocene's rapid pace of change without further separating psyche from biosphere why we should understand migration both ecologically and culturally how to achieve constructive connectivity in both social and ecological networks and why we should take a cosmopolitan bioregionalism perspective that unites local and global Throughout Thomashow invites readers to participate as educational explorers encouraging them to better understand how and why environmental learning is crucial to human flourishing **Cities in a World Economy** Saskia Sassen, 2018-05-30 *Cities in a World Economy* Fifth Edition examines the emergence of global cities as a new social formation As sites of rapid and widespread developments in the areas of finance information and people global cities lie at the core of the major processes of globalization The book reflects the most current data available and explores recent debates such as the role of cities in mitigating environmental problems the global refugee

crisis Brexit and the rise of Donald Trump in the United States *Cities of Tomorrow and the City to Come* Noah J. Toly, 2015-05-05 Each day the world's urban population swells by almost 200 000 With every passing week more than a million people new to cities face unexpected realities and challenges of urban life Just like the sheer volume of people in the city these challenges can be staggering As with the height and breadth of our metropolises the wonders of urban life can be breathtaking Like the city itself the questions and challenges of urban life are both sprawling and pulsing with vitality As part of Zondervan's Ordinary Theology series this volume offers a series of Christian reflections on some of the most basic and universal challenges of 21st century urban life It takes one important dimension of what it means to be human that human beings are made to be for God for others and for creation and asks What are the implications of who God made us to be for how we ought to live in our cities This book is intended for Christians facing the riddle of urban creation care discerning the shape of community life struggling with the challenges of wealth and poverty and wondering at the global influence of cities It is meant for those whose lives and livelihoods are inextricably bound up in the flourishing of their neighborhood and also for those who live in the shadow of cities Most of all it is meant for those grappling with the relationship between the cities of tomorrow and the glorious city to come Stay in the City Mark R. Gornik, Maria Liu Wong, 2017-10-09 We live in an urban age To a degree unprecedented in human history most of the world's people live in cities It is thus vital say Mark Gornik and Maria Liu Wong for Christians to think constructively about how to live out their faith in an urban setting In *Stay in the City* Gornik and Liu Wong look at what is happening in the urban church and what Christians everywhere can learn from it Once viewed suspiciously for their worldly temptations and vices cities are increasingly becoming centers of vibrant Christian faith Writing from their experience living and working in New York City Gornik and Liu Wong invite readers everywhere to join together in creating a more flourishing and faith-filled urban world **Cities of the World** Stanley D. Brunn, Donald J. Zeigler, Maureen Hays-Mitchell, Jessica K. Graybill, 2020-03-03 Remarkably more than half of the world's population now lives in cities and the numbers grow daily as people abandon rural areas This fully updated and revised seventh edition of the classic text offers readers a comprehensive set of tools for understanding world regional geography as seen through the urban landscape and by extension the world's politics cultures and economies Providing a sweeping overview of world urban geography noted experts explore the major global regions Each regional chapter considers urban history economy culture and environment as well as special problems and future prospects A regional map that shows the major cities a summary of basic statistical information about the cities and urbanization in each region and a list of ten salient points about that region's urban experience frame each region Chapters conclude with a list of references including films and webpages which can be used by the student and instructor for additional information about specific cities This edition adds the important new themes of climate change and migration while continuing to focus specifically on sustainability water technology social and environmental justice security and conflict the history of urban settlement urban planning trends and daily life Vignettes of

key cities give the reader a vivid understanding of daily life and the spirit of place The opening chapter presents an overview of key terms and concepts and explores contemporary world urbanization and a concluding chapter projects the world's urban future Generously illustrated in full color with a new selection of photographs maps and diagrams the text also includes a rich array of textboxes to highlight key topics ranging from migration and immigration to LGBTQ activism human security and climate change Clearly written and timely Cities of the World will be invaluable for those teaching introductory or advanced classes on global cities regional geography the developing world and global urban studies Society of Singularities Andreas Reckwitz, 2020-04-21 Our contemporary societies place more and more emphasis on the singular and the unique The industrial societies of the early 20th century produced standardized products cities subjects and organizations which tended to look the same but in our late modern societies we value the exceptional unique objects experiences places individuals events and communities which are beyond the ordinary and which claim a certain authenticity Industrial society's logic of the general has been replaced by late modernity's logic of the particular In this major new book Andreas Reckwitz examines the causes structures and consequences of the society of singularities in which we now live The transformation from industrial to cultural capitalism the rise of digital technologies and their culture machine and the emergence of an educated urban new middle class form a powerful engine for the singularization of the social In late modernity what is singular is valorized and stirs the emotions while what is general has to remain in the background and this has profound social consequences The society of singularities systematically produces devaluation and inequality winner takes all markets job polarization the neglect of rural regions and the alienation of the traditional middle class The emergence of populism and the rise of aggressive forms of nationalism which emphasize the cultural authenticity of one's own people thus turn out to be the other side of singularization This prize winning book offers a new perspective on how modern societies have changed in recent decades and it will be of great value to anyone interested in the forces that are shaping our world today
