Beginning Glassblowing:

Beginning Glassblowing Edward T. Schmid,1998 **New York Magazine** ,1997-08-04 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Laboratory Scientific Glassblowing: Advanced Techniques And Glassblowing's Place In History* Paul Le Pinnet,2022-03-14 Related Title Laboratory Scientific Glassblowing A Practical Training Method This book pushes back the boundaries of Scientific Glassblowing emphasizing the possibilities of the material In addition to the author s own chapters he has invited Scientific Glassblowers from around the world to describe advanced glassblowing techniques in addition to the historical background of its development **Art of Fire - Beginning Glassblowing** James McKelvey,2006-01-01 From the Back Cover Studio time is expensive Unfortunately most glassblowing students still learn through a combination of apprenticeship and observation a slow and inefficient method The Art of Fire teaches you quickly how to manipulate the glass through a series of structured lessons and exercises including Safety exercises to prevent burns Over 500 photographs and illustrations Step by step instruction for all basic techniques Fixes for more than 50 common problems **Practicing Culture** Craig Calhoun,Richard Sennett,2007-08-07 Practicing Culture revitalizes the field of cultural sociology with an emphasis not on abstract theoretical debates but on showing how to put theoretical sources to work in empirical research Each of the chapters in this book offer a provocative empirical case study of how culture works in practice and how practice makes and remakes culture It is an essential tool for students and researchers of cultural theory contemporary social theory and cultural sociology Through a Glass, Deadly Sarah Atwell,2008-03-04 Glassblower Emmeline Dowell has made a home for herself among the artists of Tucson s Warehouse District Between teaching her craft and selling her wares she has plenty to do not to mention the occasional murder to put a crack in her routine With a weakness for taking in strays from homeless dogs to extra students Emmeline can t help befriending the troubled newcomer Allison McBride But their friendship takes a dangerous turn when Allison s husband turns up dead in Em s studio Now Emmeline is involved in a murder investigation that reaches beyond the sunny Southwest And when the killer acts again it s up to her to pick up the shards of Allison s life before it s too late **Beginning Glassblowing** Ben Jerald,2021-08-21 GLASS BLOWING Glassblowing is the artwork of shaping molten glass using blowing air into it via a lengthy steel tube Glass is composed of a range of materials The most frequent sorts used these days are lead crystal and soda lime glass Lead crystal most normally used for blowing is made from a combination of silica sand 24% lead oxide small quantities of chemical substances like potash and a cullet crushed waste glass Soda lime glass is made from sand and soda lime and is the most frequent form of family glassware observed today *Glass* ,2006 Fire Craft Erin E.

O'Connor, 2025-08-12 Glassblowing by hand might seem like a dying art yet it is thriving Studios and universities offer popular classes and glass art is widely exhibited and sold Amateur and professional glassblowers alike are captivated by the choreography of fire smoke and molten material Why are people drawn to this ancient craft What is distinctive about the social physical and intellectual experience of glassblowing How does the body learn an art In *Fire Craft* Erin E O Connor interweaves an immersive firsthand account of her experiences learning to blow glass with a sensuous ethnography of embodiment and community among glassblowers Through compelling stories such as her struggle to produce an elegant goblet she shows how a novice becomes hooked by and committed to a craft Reflecting on embodied knowledge O Connor considers how we negotiate mistakes and failures how we strive to develop proficiency in the face of shortcomings and how through making objects we make meaning She also explores the history of glassblowing and how various social environmental and knowledge frameworks shape the valorization of craft From the furnaces of empire to the hot bodies of collaboration and love O Connor reveals the interconnectedness of the body with the elemental world A gripping tale of the social world and experience of glassblowing *Fire Craft* passionately defends practical labor as intellectual work that changes self and society

Studio Studies Ignacio Farías, Alex Wilkie, 2015-10-14 Consider the vast array of things around you from the building you are in the lights illuminating the interior the computational devices mediating your life the music in the background even the crockery furniture and glassware you are in the presence of Common to all these objects is that their concrete visual and technological forms were invariably conceived modelled finished and tested in sites characterised as studios Remarkably the studio remains a peculiar lacuna in our understanding of how cultural artefacts are brought into being and how creativity operates as a located practice *Studio Studies* is an agenda setting volume that presents a set of empirical case studies that explore and examine the studio as a key setting for aesthetic and material production As such *Studio Studies* responds to three contemporary concerns in social and cultural thought first how to account for the situated nature of creative and cultural production second the challenge of reimagining creativity as a socio materially distributed practice rather than the cognitive privilege of the individual and finally to unravel the parallels contrasts and interconnections between studios and other sites of cultural aesthetic and technoscientific production notably laboratories By enquiring into the operations topologies and displacements that shape and format studios this volume aims to demarcate a novel and important object of analysis for empirical social and cultural research as well to develop new conceptual repertoires to unpack the multiple ways studio processes shape our everyday lives
