Behind The Crisis Marx's Dialectic Of Value And Knowledge Historical Materialism:

Behind the Crisis Guglielmo Carchedi, 2010-12-17 Drawing on modern philosophy of science epistemology economics and sociology this work retraces Marx's original multi disciplinary project and develops its foundations into a modern Marxist paradigm capable of understanding the present crisis and of challenging contemporary capitalism Marx's Not-Capital Benjamin Tetler, 2024-05-23 As a contribution to critical social theory this book reconsiders Marx's critique of political economy through the concept of labour as not capital Engaging with thinkers who have dealt with Marx's concepts of not capital and not value Tetler examines whether and how these concepts can contribute significantly towards a renewal of the critique of political economy beyond the limits of traditional Marxism In doing so he provides the first in depth interrogation of these concepts both within Marx's work itself and within and across the various intellectuals who have put them to use in their attempts to address the faults of traditional Marxism He argues that the theory of value that sits at the heart of Marx's critique of political economy requires a negative conception of labour In helping establish this the notions of labour as not capital value are shown to have formidable ramifications concerning the crisis ridden nature of capitalist social relations and the struggles operative within and against them *Against the Crisis* Ståle Holgersen, 2024-11-26 If crisis defines our era we need a coherent socialist policy in response Ståle Holgersen delves into today's economic and ecological crises to demonstrate that they are not exceptions to an otherwise functioning system but integral to its operation It is naive to see these upheavals as opportunities for reform or revolution They are the bedrock of the status quo Fortunately the vicious circle sustaining capitalism is not founded on an iron law Our historical mission in the face of the climate crisis is to create a historical exception to the rule It is time for ecosocialism against crisis The Concept in Crisis Nick Nesbitt, 2017-07-20 The publication of *Reading Capital* by Louis Althusser tienne Balibar Roger Establet Pierre Macherey and Jacques Rancière in 1965 marked a key intervention in Marxist philosophy and critical theory bringing forth a stunning array of concepts that continue to inspire philosophical reflection of the highest magnitude *The Concept in Crisis* reconsiders the volume's reading of Marx and renews its call for a critique of capitalism and culture for the twenty first century The contributors who include Alain Badiou tienne Balibar and Fernanda Navarro interrogate Althusser's contributions in particular within the context of what is surely the most famous collective reading of Marx ever undertaken Among other topics they offer a symptomatic critique of Althusser consider his writing as a materialist production of knowledge analyze the volume's conceptualization of value and crisis examine how leftist Latin American leaders like Che Guevara and Subcomandante Marcos engaged with Althusser and *Reading Capital* and draw out the volume's implications and use for feminist theory and praxis Retrieving the inspiration that drove Althusser's reinterpretation of Marx *The Concept in Crisis* explains why *Reading Capital*'s revolutionary inflection retains its critical appeal prompting readers to reconsider Marx's relevance in an era of neoliberal capitalism Contributors Emily Apter Alain Badiou tienne Balibar Bruno Bosteels Adrian Johnston Warren Montag Fernanda

Dialectics and Political Economy R. Albritton, J. Simoulidis, 2002-11-29 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity

Marx's Dream Tom Rockmore, 2018-06-07 Two centuries after his birth Karl Marx is read almost solely through the lens of Marxism his works examined for how they fit into the doctrine that was developed from them after his death With Marx's Dream Tom Rockmore offers a much needed alternative view distinguishing rigorously between Marx and Marxism Rockmore breaks with the Marxist view of Marx in three key ways First he shows that the concern with the relation of theory to practice reflected in Marx's famous claim that philosophers only interpret the world while the point is to change it arose as early as Socrates and has been central to philosophy in its best moments Second he seeks to free Marx from his unsolicited Marxist embrace in order to consider his theory on its own merits And crucially Rockmore relies on the normal standards of philosophical debate without the special pleading to which Marxist accounts too often resort Marx's failures as a thinker Rockmore shows lie less in his diagnosis of industrial capitalism's problems than in the suggested remedies which are often unsound Only a philosopher of Rockmore's stature could tackle a project this substantial and the results are remarkable a fresh Marx unencumbered by doctrine and full of insights that remain salient today

Value, Technical Change and Crisis David Laibman, 2016-09-16 This text brings together studies in various aspects of the theory of the capitalist economy It focuses on major themes of the Marxist tradition that postulate the existence and importance of social relations and structures underlying the esoteric realm of economic categories prices profits wages etc The author takes a reappraising critical look at the concepts of the deep structure value exploitation immanent crisis using the analytical tools of modern economics to improve those concepts The book is divided into four parts Part 1 explores the essential nature of capitalism re-examining problems in the theory of value and exploitation Part 2 tackles the issue of capitalism specific paths of growth and technical change putting forward a rigorous theory of biased technical change and non-steady state growth Part 3 examines the cyclical character of capitalist growth and the theory of crises Finally Part 4 places capitalism in the wider framework of modes of production considering

the theory of precapitalist formations and aspects of the theory and practical experience of socialism The guiding theme is the combination or confrontation of rigorous quantitative analytical techniques with equally demanding qualitative and political economic conceptualization The book s premise is that this interface is essential to a progressive yet distinctively Marxist social theory **The Dialectic of Capital (2 Vols.)** Thomas Sekine,2020-07-13 This is the first book written in English that tries to expose the thing in itself or inner logic of capitalism in a form homomorphic to Hegel s Logic following the method previously established in Japan by K z Uno 1987 1977 Neither bourgeois liberal nor even conventionally Marxist economics possess a logical hence objective knowledge of capitalism as such which is regrettable The manuscript of this book was completed in typescript at York University Canada in 1983 then privately published in that form by the author in about 500 copies which are by now virtually dispersed In order however to re launch economics as objective knowledge when the world must prepare itself to correctly terminate capitalism we need to rediscover a book of this kind as a dependable guide
