Choreomata Roberto Alonso Trillo, Marek Poliks, 2023-12-21 Is artificial intelligence AI becoming more and more expressive or is human thought adopting more and more structures from computation What does it mean to perform oneself through AI or to construct one's subjectivity through AI How does AI continue to complicate what it means to have a body Has the golden age of AI especially with regards to creative applications already ended Choreomata Performance and Performativity after AI is a book about performance and performativity but more specifically it is a book about the performance of artificiality and the performance of intelligence Both humans and human designed computational forces are thoroughly engaged in an entangled mutual performance of AI Choreomata spins up a latticework of interdisciplinary thought pairing theoretical inquiry from philosophy information theory and computer science with practical case studies from visual art dance music and social theory Through cross disciplinary proportions and a diverse roster of contributors this book contains insights for computer scientists social scientists industry professionals artists and beyond Queer Environmentality Robert Azzarello, 2016-04-15 Offering a model for meaningful dialogue between queer studies and environmental studies Robert Azzarello's book traces a queer environmental lineage in American Romantic and post Romantic literature Azzarello challenges the notion that reading environmental literature is unsatisfying in terms of aesthetics and proposes an understanding of literary environmentalism that is rich in poetic complexity With the term queer environmentality Azzarello points towards a queer sensibility in the history of environmental literature to balance the dominant narrative that reading environmental literature is tantamount to witnessing a spectacular dramatization of heterosexual teleology Azzarello's study treats four key figures in the American literary tradition Henry David Thoreau Herman Melville Willa Cather and Djuna Barnes Each of these writers problematizes conventional notions of the strange

matrix between the human the natural and the sexual They brilliantly demonstrate the ways in which the queer project and the environmental project are always connected or put another way show that questions and politics of human sexuality are always entwined with those associated with the other than human world *Digital Cultures and the Politics of Emotion* Athina Karatzogianni, Adi Kuntsman, 2012-03-13 Fifteen thought provoking essays engage in an innovative dialogue between cultural studies of affect feelings and emotions and digital cultures new media and technology The volume provides a fascinating dialogue that cuts across disciplines media platforms and geographic and linguistic boundaries *General Ecology* Erich Hörl, James Edward Burton, 2017-05-04 Ecology has become one of the most urgent and lively fields in both the humanities and sciences In a dramatic widening of scope beyond its original concern with the coexistence of living organisms within a natural environment it is now recognized that there are ecologies of mind information sensation perception power participation media behavior belonging values the social the political a thousand ecologies This proliferation is not simply a metaphorical extension of the figurative potential of natural ecology rather it reflects the thoroughgoing imbrication of natural and technological elements in the constitution of the contemporary environments we inhabit the rise of a cybernetic natural state with its corresponding mode of power Hence this ecology of ecologies initiates and demands that we go beyond the specificity of any particular ecology a general thinking of ecology which may also constitute an ecological transformation of thought itself is required In this ambitious and radical new volume of writings some of the most exciting contemporary thinkers in the field take on the task of revealing and theorizing the extent of the ecologization of existence as the effect of our contemporary sociotechnological condition together they bring out the complexity and urgency of the challenge of ecological thought one we cannot avoid if we want to ask and indeed have a chance of affecting what forms of life agency modes of existence human or otherwise will participate and how in this planet s future
