

AVEVA VPRM 9.6

Managing projects faster, better, more economically

Executing an engineering project is a complex process. It involves workflows that require the collaboration of many participants: the client, various engineering disciplines, procurement and construction personnel, vendors and subcontractors. Vast quantities of technical, financial and administrative data are generated during the life of a project. This data is created and shared across many locations that are often separated by considerable distances and time zones.

AVEVA VPRM is an integrated engineering IT solution suite that supports all phases of the process plant engineering workflow. From engineering design and specification, through 3D layout to procurement, materials management and project control, VPRM provides unrivalled data integrity, within a framework of applications which is flexible enough to meet the diverse requirements of users. It can also integrate with other engineering solutions, many analysis packages, business systems and CAD engines.

VPRM facilitates the management of risk, improves the quality of execution, reduces costs and provides project control throughout the life of a project. VPRM helps to ensure that:

- The right materials are delivered to the right place, at the right time.
- The right documents are issued at the right time, to the right person.
- Progress and costs are accurately monitored.
- Management decisions are based on up-to-date, accurate and timely data.
- Coherent historical data is available for use when bidding for new projects.
- Accurate and detailed data can be extracted for management reporting.
