Axio 2015 Manual:

Manual of Forensic Taphonomy James T. Pokines, Ericka N. L'Abbe, Steven A. Symes, 2021-12-30 The main goals in any forensic skeletal analysis are to answer who is the person represented individualization how that person died trauma pathology and when that person died the postmortem interval or PMI The analyses necessary to generate the biological profile include the determination of human nonhuman or nonosseous origin the minimum number of individuals represented age at death sex stature ancestry perimortem trauma antemortem trauma osseous pathology odontology and taphonomic effects the postmortem modifications to a set of remains The Manual of Forensic Taphonomy Second Edition covers the fundamental principles of these postmortem changes encountered during case analysis Taphonomic processes can be highly destructive and subtract information from bones regarding their utility in determining other aspects of the biological profile but they also can add information regarding the entire postmortem history of the remains and the relative timing of those effects The taphonomic analyses outlined provide guidance on how to separate natural agencies from human caused trauma These analyses are also performed in conjunction with the field processing of recovery scenes and the interpretation of the site formation and their postdepositional history The individual chapters categorize these alterations to skeletal remains illustrate and explain their significance and demonstrate differential diagnosis among them Such observations may then be combined into higher order patterns to aid forensic investigators in determining what happened to those remains in the interval from death to analysis including the environments in which the remains were deposited including buried terrestrial surface marine freshwater or cultural contexts Features Provides nearly 300 full color illustrations of both common and rare taphonomic effects to bones derived from actual forensic cases Presents new research including experimentation on recovery rates during surface search timing of marine alterations trophy skulls taphonomic laboratory and field methods laws regarding the relative timing of taphonomic effects reptile taphonomy human decomposition and microscopic alterations by invertebrates to bones Explains and illustrates common taphonomic effects and clarifies standard terminology for uniformity and usage within in the field While the book is primarily focused upon large vertebrate and specifically human skeletal remains it effectively synthesizes data from human ethological geological paleontological paleoanthropological archaeological artifactual and zooarchaeological studies Since these taphonomic processes affect other vertebrates in similar manners The Manual of Forensic Taphonomy Second Edition will be invaluable to a broad set of forensic and investigative disciplines

A Contemporary Comprehensive Economic Science Stefano Spalletti, Francesca Spigarelli, 2025-11-18 Covering Maffeo Pantaleoni s key areas of contribution to economics this book provides a comprehensive study of one of the foremost economic thinkers of the late 19th and early 20th centuries Called the prince of Italian economists by Piero Sraffa among others Maffeo Pantaleoni 1857 1924 was an original and innovative thinker but also bizarre and extravagant As a result he did not produce an inherently continuous and systematic work but his contributions

oscillate between a shifting idealism and heterogeneous operational criteria Contrasting with the specialisation which pervades the economic sciences today rereading Pantaleoni one hundred years after his death it is clear that he excelled in pure as much as in applied economics in public economics as in statistical or historical economic studies Overall his expertise spanned fields of economics that are now considered disaggregated and distant from each other Thus the Pantaleonian spirit which was innovative and completist and could not be confined within any enclosure was lost a century ago This volume brings together a group of specialists capable of identifying the many points of contact between Pantaleoni s multiform thought and the disciplinary plurality of his economics thus providing A Complete Economic Science of which Pantaleoni would be proud The book will be of interest to economists readers in history of economic thought intellectual history Italian history more broadly and scholars with diverse profiles of interest

Dental and Periodontal Tissues Formation and Regeneration: Current Approaches and Future Challenges Giovanna Orsini,Victor E. Arana-Chavez,Thimios Mitsiadis,2016-10-07 Sequential and reciprocal interactions between oral epithelial and cranial neural crest derived mesenchymal cells give rise to the teeth and periodontium Teeth are vital organs containing

a rich number of blood vessels and nerve fibers within the dental pulp and periodontium Teeth are composed by unique and specific collagenous dentin fibrillar cementum and non collagenous enamel highly mineralized extracellular matrices Alveolar bone is another collagenous hard tissue that supports tooth stability and function through its close interaction with the periodontal ligament Dental hard tissues are often damaged after infection or traumatic injuries that lead to the partial or complete destruction of the functional dental and supportive tissues Well established protocols are routinely used in dental clinics for the restoration or replacement of the damaged tooth and alveolar bone areas Recent progress in the fields of cell biology tissue engineering and nanotechnology offers promising opportunities to repair damaged or missing dental tissues Indeed pulp and periodontal tissue regeneration is progressing rapidly with the application of stem cells biodegradable scaffolds and growth factors Furthermore methods that enable partial dental hard tissue repair and regeneration are being evaluated with variable degrees of success However these cell based therapies are still incipient and many issues need to be addressed before any clinical application The understanding of tooth and periodontal tissues formation would be beneficial for improving regenerative attempts in dental clinics In the present e book we have covered the various aspects dealing with dental and periodontal tissues physiology and regeneration in 6 chapters 1 General principles on the use of stem cells for regenerating craniofacial and dental tissues 2 The roles of nerves vessels and stem cell niches in tissue regeneration 3 Dental pulp regeneration and mechanisms of various odontoblast functions 4 Dental root and periodontal physiology pathology and regeneration 5 Physiology and regeneration of the bone using various scaffolds and stem cell populations 6 Physiology pathology and regeneration of enamel using dental epithelial stem cells
