

Abstract of dissertation entitled

Outlander and the Female Gaze:
A Feminist Study on Gender and Body Representations

Submitted by

LUI Chung Man

at The University of Hong Kong
in August 2018

This research posits that the television series *Outlander* utilizes the female gaze to create gender and body representations that espouse feminist ideologies. Feminism has been a brewing force within popular culture since films and television are two mainstream mediums through which ideologies are spread. The male gaze proposed by Laura Mulvey propels a patriarchal subconscious that effects gender representations on screen to maintain an unbalanced relationship of male/dominant and female/passive. As a critically acclaimed series, *Outlander* goes beyond the clichés of romance and historical television by weaving a narrative from the female gaze that centres on female empowerment and inclusivity to bring forth a herstory that resonates with the feminine mystique along with other oppressions that women still struggle with today. In three chapters, this dissertation discusses thematically and visually from the characterisation of the heroine Claire Beauchamp as a woman of substance, the complex representations of female bonding, to the nature of the female gaze and how it channels nudity and sex into televisual pleasure. The study concludes that the female gaze enables *Outlander* to express the complexity of womanhood by illustrating a relatable struggle with balancing the work and domestic spheres, as well as exploring female heterosexual desire with a welcoming attitude. From a feminist angle, *Outlander* stands as an influential global cultural phenomenon that echoes with the gender situations nowadays as a fictional yet relevant and popular romance television series.
