Sports-Related Concussions in Youth National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Sports-Related Concussions in Youth, 2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information

much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal

No Game for Boys to Play Kathleen Bachynski, 2019-11-25 From the untimely deaths of young athletes to chronic disease among retired players roiling debates over tackle football have profound implications for more than one million American boys some as young as five years old who play the sport every year In this book Kathleen Bachynski offers the first history of youth tackle football and debates over its safety In the postwar United States high school football was celebrated as a moral sport for young boys one that promised and celebrated the creation of the honorable male citizen Even so Bachynski shows that throughout the twentieth century coaches sports equipment manufacturers and even doctors were more concerned with saving the game than young boys safety even though injuries ranged from concussions and broken bones to paralysis and death By exploring sport masculinity and citizenship Bachynski uncovers the cultural priorities other than child health that made a collision sport the most popular high school game for American boys These deep rooted beliefs continue to shape the safety debate and the possible future of youth tackle football
