Inventing Baby Food Amy Bentley, 2014-09-19 Food consumption is a significant and complex social activity and what a society chooses to feed its children reveals much about its tastes and ideas regarding health In this groundbreaking historical work Amy Bentley

explores how the invention of commercial baby food shaped American notions of infancy and influenced the evolution of parental and pediatric care Until the late nineteenth century infants were almost exclusively fed breast milk But over the course of a few short decades Americans began feeding their babies formula and solid foods frequently as early as a few weeks after birth By the 1950s commercial baby food had become emblematic of all things modern in postwar America Little jars of baby food were thought to resolve a multitude of problems in the domestic sphere they reduced parental anxieties about nutrition and health they made caretakers feel empowered and they offered women entering the workforce an irresistible convenience But these baby food products laden with sugar salt and starch also became a gateway to the industrialized diet that blossomed during this period Today baby food continues to be shaped by medical commercial and parenting trends Baby food producers now contend with health and nutrition problems as well as the rise of alternative food movements All of this matters because as the author suggests it is during infancy that American palates become acclimated to tastes and textures including those of highly processed minimally nutritious and calorie dense industrial food products

User's Guide to Nutritional Supplements Jack Challem, 2003 The User's Guide to Nutritional Supplements focuses on the most popular nutritional supplements those that consistently attract the most attention and are the ones most likely to benefit the majority of people In describing the most popular nutritional supplements this book explains Vitamin E can reduce the risk of heart disease and the best types to take Selenium can slash the chances of developing some types of cancer Ginkgo can improve memory and recall Chromium can help promote weight loss and lower the risk of diabetes Glucosamine and chondroitin can prevent osteoarthritis Calcium and magnesium work together to build strong bones Coenzyme Q10 can boost your energy levels and strengthen your heart Ginseng and other supplements boost your exercise stamina The Rural Efficiency Guide, 1918 Baby Facts Andrew Adesman, 2009-01-08 Ear infections need to be treated with antibiotics Newborns and infants should be bathed daily New parents are deluged with advice on how to care for their babies This book explores common baby health myths in areas such as feeding sleeping toilet training and illness to help them separate baby facts from baby fiction
