Manual de conductas adictivas Roberto Secades-Villa, Gloria García-Fernández, Sergio Fernández

Artamendi, 2022-10-13 El campo de las conductas adictivas es un ámbito profesional de gran demanda y expansión entre los profesionales sanitarios y en especial entre los psicólogos. La relevancia del papel de la psicología viene avalada por la evidencia demostrada de la efectividad de las terapias psicológicas en el tratamiento de este tipo de problemas. Frente al reduccionismo biológico, la naturaleza esencial del modelo psicológico consiste en analizar y explicar las conductas adictivas en relación con el contexto como parte esencial de la concepción biopsicosocial que constituye hoy en día el marco predominante en el tratamiento de las conductas adictivas. Los tratamientos psicológicos de las conductas adictivas han tenido importantes avances en los últimos años y de ahí la necesidad de disponer de un manual en español que describa la situación actual en este ámbito de intervención. Este libro nace con la idea de aportar un análisis riguroso de este tipo de problemas basado en los datos que aporta la investigación y la práctica clínica. En esta obra en oposición a lo que se acostumbra en este tipo de publicaciones se ha optado por una exposición transversal adoptando un modelo transdiagnóstico organizando los capítulos en función de los procedimientos y no en relación con las sustancias como si se tratara de fenómenos esencialmente diferentes. Este manual tiene una orientación didáctica y se ha escrito pensando en los estudiantes y en los profesionales de la psicología aunque también es útil para otros especialistas de la salud que están interesados en este tipo de problemas. La calidad científica de los contenidos del texto está acreditada por la participación de más de cuarenta excelentes expertos provenientes tanto del ámbito clínico como académico que proporcionan una visión rigurosa y actual acerca de los principales procedimientos de evaluación y tratamiento de los trastornos por uso de sustancias y de otras conductas adictivas.

Binge Drinking in the

Adolescent and Young Brain, Volume II Eduardo López-Caneda, Salvatore Campanelle, Séverine Lannoy, Carina

Carbia, 2024-01-23 This Research Topic is the second volume of Research Topic Binge Drinking in the Adolescent and Young Brain. Please see the first volume here. Binge drinking (BD) also known as heavy episodic drinking or college drinking is a highly prevalent pattern in most Western countries characterized by the intake of large amounts of alcohol in a short time followed by periods of abstinence. This excessive pattern of alcohol use is a regular practice in around a third of European and American youth. The high prevalence of BD at this age is of particular concern since adolescents are in a period of special vulnerability to neurotoxic effects of alcohol mainly due to the structural and functional changes going on in the brain throughout this key developmental stage. As showed in the first volume of the Research Topic evidence gathered during the last decade from animal and human studies seems to point out multiple brain anomalies associated with BD at different levels.

biochemical structural functional but also cognitive and affective In this Second Volume our aim is to bring together the most recent studies namely original research and systematic or critical reviews which provide a comprehensive approach regarding the effects of BD on the adolescent and young brain Thus we aim to include manuscripts from different domains preclinical and clinical research perspectives genetic behavioral neuropsychological clinical psychology psychophysiology neuroimaging etc and methods behavioural biochemical EEG MEG MRI etc Likewise we welcome submissions aimed at examining the effects of BD beyond the brain personality dimensions polygenic risk peripheral inflammation cortisol response gut microbiome etc and approaches focused on reducing BD such as cognitive training and or neuromodulation by tDCS TMS etc Textbook of Addiction Treatment Nady el-Guebaly, Giuseppe Carrà, Marc Galanter, Alexander M.

Baldacchino, 2020-11-03 Addiction is increasingly being recognized as a major global public health issue and an ever growing number of medical specialties psychological and social science training programs and professional associations are including addiction as part of their training and continuing education curricula The first edition of this book presented an overview of the spectrum of addiction related problems across different cultures around the globe Sharing the experience and wisdom of more than 260 leading experts in the field and promoted by the International Society of Addiction Medicine it compared and contrasted clinical practices in the field of addiction medicine on the basis of neurobiological similarities as well as epidemiological and socio cultural differences Building on the success of this inaugural edition and taking into account the formal and informal comments received as well as an assessment of current need this textbook presents general updated information while retaining the most requested sections of the first edition as demonstrated by the number of chapter downloads It also provides a basic text for those preparing for the ISAM annual certification exam Written by some 220 international experts it is a valuable reference resource for anyone interested in medicine psychology nursing and social science **Survey of Teachers in Pre-primary Education (STEPP)** Ahmed, Syeda Kashfee, Kaga,

Yoshie, UNESCO, Walker, Maurice, 2020-09-10 The present publication documents the achievements and lessons learned from the first phase of the Survey of Teachers in Pre primary Education STEPP project implemented by UNESCO from 2016 to 2019 with the participation of seven countries namely the Dominican Republic Ghana Indonesia Namibia the Philippines Togo and Viet Nam It is the first international survey for low and middle income countries designed to collect information that is known to affect the quality of pre primary education from pre primary teachers and centre heads The collected information concerns training and professional development pedagogical and professional practices working conditions and job satisfaction and characteristics of pre primary personnel and the settings in which they work The survey offers a valuable opportunity for teachers and centre heads to share views about their practice and needs It seeks to identify strengths and opportunities for improvement as well as commonalities and differences across participating countries which will inform policy discussions and development of measures on how to strengthen the quality of pre primary teachers work Abstract

Philosophy For, With, and Of Children Monica B. Glina, 2014-09-26 On one level Philosophy for Children P4C exists takes place and is understood as a set of relatively theory neutral practices we share a story or other kind of stimulus that is both meaningful and philosophically problematic we raise questions about it that will help us inquire into what is problematic we inquire together as a community of philosophical inquiry mostly through a process of dialogue we explore ways to experiment with these dialogical judgments in writing in works of art in action and in life and we self assess our own thinking and our work as a community of inquiry in order to collectively self correct On another level P4C exists takes place and is understood as a set of theory laden and agenda laden practices that are undertaken as means to certain kinds of desired outcomes These are the program s aims and objectives and they come from three places the core practices inherent in P4C those that have become obvious to practitioners or have developed out of extensive practice and those that have developed out of philosophical and empirical research in philosophy and education including epistemology learning theory argumentation theory and the politics of discourse and political theory This last kind of work presents the challenge to P4C to find out if there is such a thing as a core theory that justifies the core practices and if so whether the integrity offered by such a theory is either shored up or compromised by being pulled in any of these other directions The diversity of curriculum materials pedagogical protocols and grounding theories P4C has spawned signifies not merely different approaches to but different conceptions of what it means to teach philosophy to children or to engage children in philosophical practices The chapters in Philosophy For With and Of Children present a broad range of directions for P4C and illustrate the considerable diversity of agendas that can be brought to it as well as the ways in which these agendas sometimes complement and sometimes undermine one another
