Arabic Medical Translation Guide:

Introduction to Healthcare for Arabic-speaking Interpreters and Translators Ineke H.M. Crezee, Nawar Gailani, Anna N. Gailani, 2016-12-08 Arabic is a language of substantial cultural and religious importance. It is spoken by about 300 million people predominantly in the 22 countries of the Arab world as well as in several other regions where the Arab diaspora has settled. Arabic is also the language of Islam and underpins the religious practice of about 1.5 billion Muslims worldwide. In view of the above, the authors thought it important to create an easily accessible handbook for interpreters, translators, educators and other practitioners working between Arabic and English in healthcare settings. Introduction to Healthcare for Arabic speaking Interpreters and Translators follows the seminal publication Introduction to Healthcare for Interpreters and Translators Crezee 2013 and has been supplemented with Arabic glossaries and comments about health communication between Anglophones and Arabic speakers. This practical resource book will help inform interpreters and translators about healthcare settings, anatomy, physiology, medical terminology and frequently encountered conditions, diagnostic tests and treatment options. Arabic is divided into two categories: formal Classical Standard or literary Arabic and local dialects. Colloquial Arabic Formal Arabic is the official language of all Arab countries. In each of these there are regional dialects which color formal Arabic and add character to a poetic and expressive language. Poetic nature is found in many daily expressions and not only in Arabic literature. For example, 'Good morning' in Arabic is 'Ssabah al khair' which in essence wishes others a morning of goodness and the pan-Arab greeting 'Salam Alaykum' which literally means 'may peace be upon you'. Dialects once existed principally in spoken form but these days they are increasingly used in writing in social media and its paraphernalia: mobile phones, tablets etc. In this book, formal Arabic is used in the glossaries simply because it is the recognized language of literacy across the Arabic speaking world.

Language as a Social Determinant of Health

Federico Marco Federici, 2022-02-22 This edited volume demonstrates the fundamental role translation and interpreting play in multilingual crises. During the COVID-19 pandemic, limited language proficiency of the main languages in which information is disseminated exposed people to additional risks and the contributors analyse risk communication plans and strategies used throughout the world to communicate measures through translation and interpreting. They show that a political willingness to understand the role of language in public health could lead local and national measures to success. Sampling approaches from across four continents, the book will be of interest to students and scholars of healthcare translation and interpreting, sociolinguistics and crisis communication as well as practitioners of risk and crisis communication and professional translators and interpreters.
