Archaeologies Of Remembrance Death And Memory In Past Societies:

Archaeologies of Remembrance Howard Williams, 2012-09-20 How did past communities and individuals remember through social and ritual practices How important were mortuary practices in processes of remembering and forgetting the past This innovative new research work focuses upon identifying strategies of remembrance Evidence can be found in a range of archaeological remains including the adornment and alteration of the body in life and death the production exchange consumption and destruction of material culture the construction use and reuse of monuments and the social ordering of architectural space and the landscape This book shows how in the past as today shared memories are important and defining aspects of social and ritual traditions and the practical actions of dealing with and disposing of the dead can form a central focus for the definition of social memory The Oxford Handbook of the Archaeology of Death and Burial

Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 This Handbook reviews the state of mortuary archaeology and its practice with forty four chapters focusing on the history of the discipline and its current scientific techniques and methods Written by leading scholars in the field it derives its examples and case studies from a wide range of time periods and geographical areas Objects of the Past in the Past: Investigating the Significance of Earlier Artefacts in Later Contexts Matthew G.

Knight, Dot Boughton, Rachel E. Wilkinson, 2019-07-31 How did past communities view understand and communicate their pasts And how can we as archaeologists understand this This volume brings together a range of case studies in which objects of the past were encountered and reappropriated *Remembering the Dead in the Ancient Near East* Benjamin W.

Porter, Alexis T. Boutin, 2014-12-02 *Remembering the Dead in the Ancient Near East* is among the first comprehensive treatments to present the diverse ways in which ancient Near Eastern civilizations memorialized and honored their dead using mortuary rituals human skeletal remains and embodied identities as a window into the memory work of past societies In six case studies teams of researchers with different skillsets osteological analysis faunal analysis culture history and the analysis of written texts and artifact analysis integrate mortuary analysis with bioarchaeological techniques Drawing upon different kinds of data including human remains ceramics jewelry spatial analysis and faunal remains found in burial sites from across the region s societies the authors paint a robust and complex picture of death in the ancient Near East

Demonstrating the still underexplored potential of bioarchaeological analysis in ancient societies *Remembering the Dead in the Ancient Near East* serves as a model for using multiple lines of evidence to reconstruct commemoration practices It will be of great interest to students and scholars of ancient Near Eastern and Egyptian societies the archaeology of death and burial bioarchaeology and human skeletal biology **Archaeology and the Homeric Epic** Susan Sherratt, John

Bennet, 2016-11-30 The relationship between the Homeric epics and archaeology has long suffered mixed fortunes swinging between fundamentalist attempts to use archaeology in order to demonstrate the essential historicity of the epics and their background and outright rejection of the idea that archaeology is capable of contributing anything at all to our understanding

and appreciation of the epics Archaeology and the Homeric Epic concentrates less on historicity in favor of exploring a variety of other perhaps sometimes more oblique ways in which we can use a multidisciplinary approach archaeology philology anthropology and social history to help offer insights into the epics the contexts of their possibly prolonged creation aspects of their prehistory and what they may have stood for at various times in their long oral and written history The effects of the Homeric epics on the history and popular reception of archaeology especially in the particular context of modern Germany is also a theme that is explored here Contributors explore a variety of issues including the relationships between visual and verbal imagery the social contexts of epic or sub epic creation or re creation the roles of bards and their relationships to different types of patrons and audiences the construction and uses of history as traceable through both epic and archaeology and the relationship between prehistoric oral and historical recorded in writing periods Throughout the emphasis is on context and its relevance to the creation transmission re creation and manipulation of epic in the present or near present as well as in the ancient Greek past

Freed Slaves and Roman Imperial Culture Rose MacLean, 2018-05-17 During the transition from Republic to Empire the Roman aristocracy adapted traditional values to accommodate the advent of monarchy *Freed Slaves and Roman Imperial Culture* examines the ways in which members of the elite appropriated strategies from freed slaves to negotiate their relationship to the princeps and to redefine measures of individual progress Primarily through the medium of inscribed burial monuments Roman freedmen entered a broader conversation about power honor virtue memory and the nature of the human life course Through this process former slaves exerted a profound influence on the transformation of aristocratic values at a critical moment in Roman history

Personal Adornment and the Construction of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation *Personal Adornment and the Construction of Identity* seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes

along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives

Rituals for the Dead William J. Courtenay, 2018-12-30 In his fascinating new book based on the Conway Lectures he delivered at Notre Dame in 2016 William Courtenay examines aspects of the religious life of one medieval institution the University of Paris in the thirteenth and fourteenth centuries In place of the traditional account of teaching programs and curriculum however the focus here is on religious observances and the important role that prayers for the dead played in the daily life of masters and students Courtenay examines the university as a consortium of sub units in which the academic and religious life of its members took place and in which prayers for the dead were a major element Throughout the book Courtenay highlights reverence for the dead which preserved their memory and was believed to reduce the time in purgatory for deceased colleagues and for founders of and donors to colleges The book also explores the advantages for poor scholars of belonging to a confraternal institution that provided benefits to all members regardless of social background the areas in which women contributed to the university community including the founding of colleges and the growth of Marian piety seeking her blessing as patron of scholarship and as protector of scholars Courtenay looks at attempts to offset the inequality between the status of masters and students rich and poor and college founders and fellows in observances concerned with death as well as rewards and punishments in the afterlife *Rituals for the Dead* is the first book length study of religious life and remembrances for the dead at the medieval University of Paris Scholars of medieval history will be an eager audience for this title

Memory and Nation Building Michael L. Galaty, 2018-08-16 *Memory and Nation Building* addresses the complex topic of collective memory first described by sociologist Maurice Halbwachs in the first half of the 20th century Author Michael Galaty argues that the first states appropriated traditional collective memory systems in order to form With this in mind he compares three Mediterranean societies Egypt Greece and Albania each of which experienced very different trajectories of state formation Galaty attributes these differences to varying responses to collective memory in all three places through time with climaxes in the Ottoman period during which all three were under Ottoman control Egypt was characterized by deeply meaningful memory tropes concerning national unity which spanned all of Egyptian history while Greece experienced memory fragmentation a condition exacerbated by periods of imperial conquest Albania adapted and assimilated when faced with foreign domination such that an indigenous Albanian state did not form until 1912 Galaty builds a diachronic model of state formation and its relationship to memory and political control *Memory and Nation Building* culminates in an analysis of modern collective memory systems and resistance to those systems which are often framed as conflicts over heritage The formation and eventual fall of the short lived Islamic State serves as an example of extreme memory work with lessons for other modern nations

The Ancient War's Impact on the Home Front Lucia Cecchet, Christopher Degelmann, Maik Patzelt, 2019-09-30 This volume presents a first comprehensive

contribution to the exploration of the concept of the home front in Greek and Roman Antiquity It crosses borders between different areas of classical studies by investigating the various forms of impact that war had on the ancient home front To this end the book deploys a variety of methodological approaches that shed light on several aspects of the home front These draw on advances made in the fields of psychology literature history social sciences and religious studies The volume discusses the impact of war on the civilian communities in terms of its effects above all on the level of the social and religious sphere
