Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial

Archaeology Medieval Archaeology and Classical Archaeology Technical Brief , 1988 **Palaeolandscapes in Archaeology** Mike T. Carson, 2021-11-29 What can we learn about the ancient landscapes of our world and how can those lessons improve our future in the landscapes that we all inhabit Those questions are addressed in this book through a practical framework of concepts and methods combined with detailed case studies around the world The chapters explore the range of physical and social attributes that have shaped and re shaped our landscapes through time International authors contributed the latest results of investigating ancient landscapes or palaeolandscapes in diverse settings of tropical forests deserts river deltas remote islands coastal zones and continental interiors The case studies embrace a broadly accommodating approach of combining archaeological evidence with other avenues of research in earth sciences biology and

social relations Individually and in concert the chapters offer new perspectives on what the world's palaeolandscapes looked like how people lived in these places and how communities have engaged with long term change in their natural and cultural environments through successive centuries and millennia The lessons are paramount for building responsible strategies and policies today and into the future noting that many of these issues from the past have gained more urgency today This book reaches across archaeology ecology geography and other studies of human environment relations that will appeal to general readers Specialists and students in these fields will find extra value in the primary datasets and in the new ideas and perspectives Furthermore this book provides unique examples from the past toward understanding the workings of sustainable landscape systems

Archaeology Hannah Cobb, Kevin Greene, Tom Moore, 2024-03-19 This fully updated sixth edition of a classic classroom text is essential reading for core courses in archaeology Archaeology An Introduction explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline and explores changing trends in interpretation in recent decades The authors convey the excitement of archaeology while helping readers to evaluate new discoveries by explaining the methods and theories that lie behind them In addition to drawing upon examples and case studies from many regions of the world and periods of the past the book incorporates the authors own fieldwork research and teaching It continues to include key reference and further reading sections to help new readers find their way through the ever expanding range of archaeological publications and online sources as well as colour illustrations and boxed topic sections to increase comprehension Serving as an accessible and lucid textbook and engaging students with contemporary issues this book is designed to support students studying Archaeology at an introductory level New to the sixth edition Inclusion of the latest survey and imaging techniques such as the use of drones and eXtended reality Updated material on developments in dating DNA analysis isotopes and population movement including consideration of the ethical considerations of these techniques Coverage of new developments in archaeological theory such as the material turn ontological turn and work on issues of equality diversity and inclusion A whole new chapter covering archaeology in the present including new sections on heritage and public archaeology and an updated consideration of archaeology's relationship with the climate crisis A revised glossary with over 200 new additions or updates

Archaeology Brian M. Fagan, Nadia Durrani, 2011-11-28 Method and Theory in Archaeology Archaeology A Brief Introduction is an introduction to the fundamental principles of method and theory in archaeology exposing students to archaeology as a career The text begins by covering the goals of archaeology and then moves on to consider the basic concepts of culture time and space by discussing the finding and excavation of archaeological sites By providing a distinct emphasis on the ethics behind archaeology and how we should act as stewards of the finite records of the human past Archaeology A Brief Introduction continues to be a book with a truly international perspective not simply focusing on North America or Europe Teaching and Learning Experience Personalize Learning MySearchLab delivers proven results in helping students succeed provides
