A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation

Prehistoric Britain Timothy Darvill, 2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth

of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain s ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject

Lee Lyman, 2021-06-10 Documentation analysis and explanation of culture change have long been goals of archaeology Scientific graphs facilitate the visual thinking that allow archaeologists to determine the relationship between variables and if well designed comprehend the processes implied by the relationship Different graph types suggest different ontologies and theories of change and particular techniques of parsing temporally continuous morphological variation of artefacts into types influence graph form North American archaeologists have grappled with finding a graph that effectively and efficiently displays culture change over time Line graphs bar graphs and numerous one off graph types were used between 1910 and 1950 after which spindle graphs displaying temporal frequency distributions of specimens within each of multiple artefact types emerged as the most readily deciphered diagram The variety of graph types used over the twentieth century indicate archaeologists often mixed elements of both Darwinian variational evolutionary change and Midas touch like transformational change Today there is minimal discussion of graph theory or graph grammar in introductory archaeology textbooks or advanced texts and elements of the two theories of evolution are still mixed Culture has changed and archaeology provides unique access to the totality of humankind s cultural past It is therefore crucial that graph theory construction and decipherment are revived in archaeological discussion

Extraordinary Cities Peter J. Taylor, 2013-01-01 Peter J Taylor has produced a sweeping empirically grounded defense of cities as fundamental building blocks of long term large scale social structures a way of freeing social science from state centric bias and indeed mankind s hope However the single greatest strength of this complex seductive argument is the insistence on treating cities relationally as process Here the key to understanding the significance of cities is by studying them in terms of the dynamic networks they form and in their relations to states Richard E Lee Binghamton University US The founding father of the famous Globalization and World Cities research network and think tank on worldwide links between cities presents this fascinating overview on cities in geohistory By moving cities to the centre stage Peter Taylor proposes that concern for states tell only part of the macro social story of humanity Cities have been and are the engines of innovation This impressive new book provides new insights into why cities succeed or fail The book is in the class with broadminded presentations like Jared Diamond s book Guns Germs and Steel Christian Matthiessen University of Copenhagen Denmark and President International Geographical Union s Commission on Urban Geography This is a big book by Peter Taylor It tells of the extraordinary world making powers of cities across the ages it explains why a state centric social science has constrained recognition of these powers over the last two centuries and it outlines a new indisciplinarity to
