Organizational Principles for Multi-Agent Architectures Chris van Aart, 2006-03-30 1 1 Background In this work we develop a framework for the design of multi agent systems inspired by human organizational principles Organizations are complex entities formed to overcome various limitations of individual agencies such as cognitive physical temporal and institutional limitations There is a parallel between the complexity of organizations and multi agent systems Therefore we explore the use of concepts methods and techniques from human organizational design as architectural principles for multi agent systems Three research lines are presented organizational modeling and coordination interoperability and agent models Organizational modeling and coordination are concerned with how resources i e agents can be identified and related to each other In order to have agents cooperate several issues of interoperability have to be addressed Agent models deal with the design of individual intelligent software agents taking into account typical features of

agent intelligence Every human activity raises two challenges division of labor and coordination Mintzberg 1993 Division of labor is the decomposition of work or goals into various distinct tasks Coordination refers to managing relations between these tasks to carry out the work The patterns of division of labor responsibilities people who do the work clustering of responsibilities into units and coordination between units can be defined by organizational structures Galbraith 1973 The design of an organization should cover how one or more actors are engaged in one or more tasks where knowledge capabilities and resources are distributed Bulletin of the Atomic Scientists ,1969-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists** ,1966-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *International Aerospace Abstracts* ,1999
